SLUG THEIR WAY TO VICTORY

Yankees Take Fifth Game of the World's Series.

DUGAN AND BUSH THE STARS

Former Raps Out Four Hits, Including a Homer, "While 'Bullet Joe' Has the Giants at His Mercy—Meusel Brothers There With the Stick. Another Victory For the Yankees and the Series Is Over.

New York, Oct. 15.—The old snap and dash, the old chatter, was missing in the Giants' play yesterday. Joe Bush of the Yankees turned them back and back, only Irish Meusel solving his wizardry for the slim total of three hits of the Giants, and they remained buried under the Yanks' big lead.

The Giants were in a slump. The question is now, Will they snap out of it? They are a great team, a team of class, and have fought the hardest in the gloomiest outlook. The Giants need right now to have their spirits prodded, their spunk lashed to the fighting full. The Yankees are hitting, fielding and getting sweet pitching. They are full of confidence. They are now behaving as the Giants did in 1921 and 1922, when the latter won.

If the Yankees can win today on the Polo grounds the series is over. They will take the world's championship four games to two, the series being four in seven. If there is a seventh game it will be played at the Yankee field, which will accommodate more customers than the Polo grounds.

The Yankees scored three times in the first inning yesterday. Dugan singled, Ruth was passed and Bob Meusel tripled, scoring Dugan and Ruth. Meusel scored on Pipp's long fly. In the second Bush rapped out a single and Witt walked. Both scored with Dugan on the latter's home run clout to right center. Ruth was safe on Kelly's error and went to third on Meusel's safety. He scored when Frisch, who snared Pipp's hot grounder, threw wide to the plate. The Yanks made their final tally in the fourth. Dugan, Ruth and Meusel singled, the former scoring.

The Giants made their lone tally in the second, when Irish Meusel tripled. He reached home on a fielder's choice.

McGraw remarked to an inquisitive spectator who asked what he thought of the game, "Too much Dugan."

To Summon Governor Walton. Oklahoma City, Okla., Oct. 15.—A subpoena for Governor J. C. Walton to appear before the legislature's investigating committee is expected to be issued early this week. The legislature is expected to attempt to impeach the governor. Inasmuch as the committee is acting as a grand jury, the summons is significant. The committee, it is believed, wishes to get the governor's testimony explaining some of his acts, so that it may go in the record. Fred Dennis, former bank commissioner, is also expected to be a witness.

DR. LOUISE STANLEY

Chief of Home Economics Bureau, Department of Agriculture.

SOLONS RETURN

Favor Establishment of Trade Relations With Russia.

New York, Oct. 15.—The unofficial Hearst commission, arriving in New York today following a three months' tour of Russia, during which they traversed more than 8,000 miles after an exhaustive investigation, favors that immediate steps be taken looking toward the establishment of trade relations between the United States and the soviet republic.

The commission, consisting of Senators Ladd and King and Representatives Frear and Johnson, issued the following statement: "The commission is preparing a full report dealing with conditions in Russia. This involves the examination of accumulated data, many statements and documents, but the committee will be ready to report soon. Until then the members will refrain from expressing their views concerning Russia. In general we found conditions in Russia better than reported by many persons and favor, that immediate steps be taken by the United States looking toward the re-establishment of trade relations between the two countries."

AMERICAN LEGION MEETS

Warfare on Ku Klux Klan One of Big Issues Before Convention.

San Francisco, Oct. 15.—American Legion convention opened here today. National Commander Alvin Owsley and a train load of Texas cow-punchers reached San Francisco Sunday, preceding the New York, Washington and Iowa delegations but a few hours. Approximately 150,000 visitors are guests of the Golden Gate metropolis.

Problems of home and country, issues toward improvement of the nation's institutions and selection of competent national officials are receiving real attention from the rank and file of the former soldiers and former gobs in attendance at the big meeting. Open warfare on the Ku Klux Klan is one of the real big issues to come before the convention.

THE WEATHER.

Ohio—Tuesday: Cloudy; not much change.

MOVES AGAINST REDS IN SAXONY

Stresemann Orders Breaking Up of Organized Bands.

AGED WORKERS INTIMIDATED

Youthful Radicals in Saxon Workers' Union in Open Revolt Against the More Cautious Conservative Elders. Communist Saxon Government Resent Order of Dictator Stresemann—Rioting at Mayence.

Berlin, Oct. 15.—Youth has declared a war of terrorism against age in Saxony, where the young, fiery radicals among the workers' unions in industrial centers are in open revolt against the more cautious conservative elders.

The young workers are intimidating the older men by their terroristic methods.

That is one of the new situations growing out of the cauldron of chaos in Germany. The more mature elements do not want to see Saxony go up in flames of revolution. Intimidated by armed organized bands of the youthful workers, they have appealed to the central government.

Acting under orders from the new dictatorial government in Berlin, which is seeking to create a new order of things in Germany, General Mueller, military commander in Saxony, continued his efforts to break up all "red army units" in that state.

The communistic-socialistic Saxon state government takes the attitude that the Berlin government exceeds its authority in mixing in Saxon state affairs and that General Mueller can not legally disband the proletarian military units, and demands the immediate withdrawal of the decree ordering that disbandment and the giving up of all arms.

Chancellor Stresemann seems determined to enforce his new dictatorial authority, realizing undoubtedly that failing to do so in Saxony would mean the failure of the authority of the central government elsewhere.

The goal of the youth of Saxony is a soviet state like Russia. In this they are openly encouraged by the Saxon cabinet, with Premier Zeigner at its head. He is but 36, the youngest German premier. The revolutionaries assert that the elders are obstructing the progress of the nation.

In Berlin Chancellor Stresemann is busy today drafting dictatorial decrees against trusts and profiteering, and for financial reforms which will be promulgated in the next few days.

Police were forced to fire on rioters at Mayence when they attempted to storm the town hall. Many of the rioters were injured. Later on the rioting spread to other sections of the city and the police again attacked the mobs, firing several volleys. In the scrimmage seven were killed and 100 wounded.

FOREST FIRES SWEEP SETTLEMENTS

Lives Lost and Property Destroyed Near Los Angeles.

Los Angeles, Oct. 15.—Forest fires that for the past 24 hours cost at least two lives and property damage estimated as high as \$1,000,000, have been brought under control. Communities north of Los Angeles were the heaviest sufferers.

The verified dead: Clarence E. Edwards, Glendale, and Joseph McGahn, Sycamore canyon. The bodies were found in Sycamore canyon. Two others are reported missing at Montrose and are probably dead.

Pasadena, one of the larger cities threatened, was saved by 4,000 fire fighters, recruited from city fire departments, county and federal forestry employees and a legion of volunteers.

The area burned over is three miles wide and seven long, lying for the most part within the city limits of Glendale and portions of the beautiful mountain settlements of Verdugo woodlands, Verdugo park, Verdugo knolls, La Crescenta, La Canada and Montrose. Within these confines are many beautiful homes, some of them pretentious country estates of the wealthy. A score were destroyed.

Three firemen were injured by falling wires of the Southern California

SIDNEY WEBB

One of the Leaders of the Labor Party in England.

Edison company, which lost hundreds of poles. Recently laid out really, subdivisions, were costly prey, improvements being destroyed. Families who lost their homes camped in canyons and glens, their numbers augmented by those who fled through fear of the flames when their homes appeared doomed.

Pasadena and Flint Bridge, where millionaire country homes predominate, were saved by Sycamore canyon, the fire fighters stopping the conflagration when it reached this natural barrier.

DOINGS IN OHIO

Bank Ordered Closed.

Miamisburg, O., Oct. 15.—The Miamisburg Banking company was ordered closed by H. E. Scott, superintendent of state banks. Scott charges misappropriation of funds by President John J. Schwartz of Dayton, totaling more than \$50,000. According to officials of the bank the defalcation will total approximately \$108,000. Schwartz was arrested and, according to police, admitted speculation in securities with bank funds which he covered up with fictitious notes.

B. & L. Men to Meet.

Columbus, Oct. 15.—One thousand Ohio building and loan association men are expected to attend the two day convention of the league, beginning Wednesday. Among issues to be considered are ways and means of increasing assets in building and loan institutions to take care of the demand for home loans.

Ohio Masons to Meet.

Springfield, O., Oct. 15.—Twenty thousand Masons are expected Tuesday, Wednesday and Thursday, when the Grand lodge of Ohio meets in annual convention. Dedication of the Rickley Memorial hospital at the Masonic home will be a feature of the meeting.

Authority on History.

Cincinnati, Oct. 15.—Merrick Whitcomb, 60, professor of history at the University of Cincinnati, died at his summer home, Shawnee-on-the-Delaware. He had been on a leave of absence. He was recognized as one of the best authorities on history in the country.

Missing Boys Found.

Lima, O., Oct. 15.—Charles and James Fleming, 13 and 11 years old, respectively, who ran away from home, were located in Monroeville, Ind., and returned to their homes here. They had gone there to visit relatives and became homesick.

Boy Shoots Sister.

Franklin, O., Oct. 15.—Angered because he thought his sister Viola, 16, had hidden his cap while at play, James Fluharty, 10, shot and wounded her probably fatally with a shotgun here.

Plunged Over Embankment.

Delaware, O., Oct. 15.—Harry Mason, 55, was instantly killed, and Jesse Gambel and Mrs. Margaret Blinn badly injured when Mason's automobile plunged over a 20-foot embankment near this city.

Sailor Drowned.

Sandusky, O., Oct. 15.—The crew of the steamer Cottonwood, which came into port to load coal, reported that Joseph Brennan, a sailor on the barge Chieftain, in tow of the Cottonwood, had fallen overboard and drowned.

Hospital Inmate Killed.

Canton, O., Oct. 15.—James Webb, 72, an inmate of the Massillon state hospital, was killed when he was struck by an automobile while walking in the road in front of the hospital grounds.

HIGH OFFICIALS BREAK DRY LAW

Charge Made By Pinchot, Governor of Pennsylvania.

CALLS UPON COOLIDGE TO ACT

No Sincere, Concerted Effort Made to Enforce the Eighteenth Amendment, Pinchot Says—Disobedience to Dry Act Flagrant at Washington, He Adds—Solicitor Beck Denounces the Amendment.

Washington, Oct. 15.—Gifford Pinchot, governor of Pennsylvania, called upon President Coolidge to take personal charge of dry law enforcement.

In an address delivered before a national citizenship conference here, Mr. Pinchot added that the effort should begin at home among high government officials, who he charged have become notorious for breaking the law.

Measured by the respect accorded it, he said, the dry law has proved a failure, and he cited these reasons: That no sincere effort has been made to enforce it; that the dry bureau is honeycombed with politics and inefficiency; that the federal government, alone responsible for the quantities of liquor released, fails to check the flow at its source, and that officials who should help either violate the law themselves or wink at violations.

Mrs. W. W. Willebrandt, assistant attorney general in charge of prohibition and tax laws, followed Governor Pinchot with what she declared would prove a more effective means of enforcing the dry laws. She said that better results could be obtained by charging offenders with violations of the internal revenue laws, which carry much heavier penalties than does the Volstead act. To do this, she said, all dry agents should be made internal revenue agents.

The air of the conference chamber was somewhat charged as an aftermath of accusations against United States Solicitor General James M. Beck by Rabbi Stephen S. Wise of New York. Dr. Wise said that Mr. Beck had no right to hold his position after saying the eighteenth amendment is a violation of personal liberties. The statement also created a stir in official circles here.

"Disregard for all law is more effectively spread by the failure of the enforcement service than in any other way," Governor Pinchot said in his address. "The bootleggers, the saloonmen and the brewers are the head and front of the army of criminals in America. All these facts taken together furnish abundant reason for treating the matter as of sufficient importance to enlist the active direction of the president himself.

"There is another reason why the president should take personal charge. Not only has the political hamstringing of the federal enforcement service had its seat in Washington, but it is notorious that disobedience to the eighteenth amendment has been flagrant in the capital. We can not expect other communities to respect and obey the law if the capital of the nation is a leader among lawbreakers.

"The eighteenth amendment has been betrayed. No sincere, intelligent and concerted nationwide effort ever has been made to enforce it. We all know the proof of that. It is found in the ease with which great quantities of liquor are being smuggled into this country; in the huge amount of whiskey made from denatured alcohol; and in the continuing sale of high power beer from the breweries in truckload and carload lots."

ALL RECORDS SMASHED

Attendance and Receipts at the Fifth Game of World's Series.

New York, Oct. 15.—All records for attendance and receipts for a baseball game were broken at the fifth game of the world's series yesterday. Fans to the number of 62,817 paid \$201,459 to see it. The best previous "gate" was \$201,077, and the best attendance 62,430, both set in the third game of the series on Friday.

The total paid attendance for the five games is 267,258, and receipts \$924,563. The million dollar "gate" for the world's series will be reached today—or the day of the next game, if rain interferes. Each club's share is now \$208,547.75. The players' share for four games is \$362,783.04. The total paid attendance for five games a year ago—the series went only five games—was 185,551 and receipts \$805,471.

OWES \$2,000,000,000

Italy to Be Next Nation to Fund Its Debt to United States.

Washington, Oct. 15.—Italy, which owes the American government \$2,000,000,000 on war loans, will be the next great European nation to fund its indebtedness to the United States. Such is the prevailing opinion here among officials and diplomats most intimately in touch with the course of Italian policy under Premier Mussolini. Some move by the Italian government is confidently expected before the end of the year.

Corroboration of these views is seen in dispatches from New York revealing that large banking interests there are planning new Italian financing along unusual lines. President Coolidge last week endorsed the making of such loans to foreign governments where they could be arranged to advantage in aiding the work of reconstruction and economic rehabilitation. The president's endorsement was given by an authorized spokesman in reply to a question dealing specifically with the proposed Italian financing as connected with obligations owed the United States.

FACE STARVATION

Millions in Germany Doomed Unless Outside World Helps.

Berlin, Oct. 15.—More than 2,000,000 children in Germany face starvation this winter unless the outside world aids them with money and food.

That is the statement made at the headquarters of the German central relief committee by Hans Gramm, director of the children's feeding organization, whose principal task is saving the youth of the crumbling German nation. "The committee is entirely out of funds," said Gramm. "There is not a penny in its coffers."

Hitherto the committee has been financed chiefly from America by the Hoover relief administration, the Quakers and by Americans of German descent.

This winter the conditions are bound to become desperate. The catastrophic drop in the value of the mark has brought large sections of the people to the edge of starvation and has cut off possible native help to that extent.

MARKET REVIEW

Columbus, Oct. 15.—Market conditions during the week are reviewed by the Ohio division of markets as follows:

LIVE STOCK AND MEATS—Chicago hog prices ranged from 10c lower to 15c higher. Beef steers 25c to 60c lower; butcher cows steady to 25c off; feeder steers 10c lower to 10c higher, and veal calves 75c higher. Fat lambs 25c to 25c higher; feeding lambs 15c to 25c and yearlings 25c to 50c up. Oct. 13 Chicago prices: Hogs, top \$8.25, bulk of sales \$7.70@8.25; medium and good beef steers, \$8.15@11.40; butcher cows and heifers, \$4.50@11; feeder steers, \$4.50@8.75; light and medium weight veal calves, \$8.50@12.75; fat lambs, \$11.50@13.75; feeding lambs, \$11.75@13.25; yearlings, \$8.75@11; fat ewes, \$3.75@6.75. In eastern wholesale fresh meat markets beef was firm to \$1, mutton firm to \$2 and pork firm to \$3 higher; lamb was \$2 net higher and veal weak to \$1 lower. Oct. 13 prices, good grade meats: Beef, \$16@19; veal, \$15@22; lamb, \$22@25; mutton, \$14@15; light pork loins, \$20@26; heavy loins, \$15 @20.

FRUITS AND VEGETABLES—Prices quoted Oct. 23: New York round white potatoes \$2 05@2 10 in New York and Baltimore; northern round whites 5c lower in Chicago at \$1 61@1 15 and at shipping points 80c@81. Onion markets dull; demand slow for yellow varieties, closing at \$3@3.50 for eastern stock, \$2.75@3.50 for midwestern stock. Cabbage market steady. New York domestic round type \$25@28 bulk per ton in New York and Baltimore; mostly \$14@15 f. o. b.; Danish type \$25@35 in city markets, mostly \$18 f. o. b. Eastern apples, demand slow; markets dull; eastern Baldwin \$3@3.25 per barrel in New York city, Jonathans \$3.50; midwestern Jonathans \$5.50@6 in Chicago.

GRAIN—Wheat prices higher earlier in the week, but eased off later. Closing prices in Chicago cash market: No. 2 red winter wheat, \$1.11; No. 2 winter wheat, \$1.12; No. 2 mixed corn, \$1.07; No. 2 yellow corn, \$1.09; No. 3 white oats, 44c. Average farm price No. 2 mixed corn in central Iowa 94c. Closing future prices: Chicago December wheat, \$1.08 3/4; Chicago December corn, 76c; Minneapolis December wheat, \$1.17 1/2; Kansas City December wheat, \$1.05 1/2; Winnipeg December wheat, 94 1/2c.

DAIRY PRODUCTS—Butter markets firm, with prices averaging 1c to 2c higher. Closing prices, 92 score: New York and Boston 47 1/2c, Philadelphia 48 1/2c, Chicago 47c. Cheese markets show tendency toward weakness. Wholesale prices Oct. 13 on fresh cheese at Wisconsin primary markets: Twins 25c, single daisies 26c, double daisies 25 1/2c, longhorns 25 1/2c, square prints 26 1/2c.

HAY—Timothy hay market firm because of light receipts. Prairie hay market lower at Chicago, receipts exceeding demand. Quoted Oct. 13: No. 1 timothy, New York \$20, Pittsburgh \$26, Memphis \$25, Cincinnati \$24, Chicago \$26.25, Minneapolis \$20, Kansas City \$17.50, No. 1 prairie, Chicago \$19, Minneapolis \$16.50, Kansas City \$14.50.

FEED—Markets remain quiet. Wheat feed prices steady to slightly easier. Inferior demand continues very light and speculative traders who bought some time ago show anxiety to resell.

THREE-C HIGHWAY THING OF BEAUTY

Important Artery of Trade in
the Buckeye State.

WINDS FROM RIVER TO LAKE

Ohio's Most Picturesque Roadway
Largely Paved With Brick, Recognized as the Most Substantial and Economical Material, and Affording the Easiest and Most Comfortable Riding.

Unquestionably one of the most picturesque and beautiful highways in Ohio, and this a very flattering compliment, as well as one of great commercial value, is the "Three C's," leading, as its name implies, from Cincinnati to Cleveland, passing through Columbus on the way. The road takes its title from these cities, the largest from the standpoint of population and business activity in the state. The thoroughfare gains its fame for scenic attractiveness through the kindly and generous way in which nature dealt out its gorgeous favors when the framework of the world was made. Gifts of rich, level, fertile land, along river and winding stream; rolling and undulating prairie; high hills and almost boundless valleys glimpsing in between, were bestowed to mark the path of this truly famous road, which winds its way from the river to the lake.

What nature in its wisdom began,

The use of brick, therefore, has revolutionized the method of taking goods from place to place and made the "C.C.C." road an important factor in commercial life.

As a means of affording pleasure to thousands of tourists and sight seers annually, or to those who desire to take a ride of a day's length only, the highway holds out an invitation which ought not to be refused. It is needless to draw on imagination when actuality can not bring to mind or eye a more restful or scenically picturesque journey than can be had by going over the "Three C's," from Mt. Vernon to Loudonville, in Ashland county. The distance is but little more than 20 miles; it is all over a splendidly laid, well balanced brick pavement, where smoothness of motion and absence of jar are blended with every degree of safety. In places the topography is such as to make sharp curves in the roadway necessary, although they have been done away with as much possible. Engineering skill has met the emergency where these conditions prevail. The roadway has been widened on the turns and slightly raised on the outside. As a result the car glides around them with the same degree of comfort as is found in the straight stretches.

Every mile of this ride is through a country so beautiful that it is doubtful if the world could show anything on a more gorgeous scale. The attractiveness is not only in the grandeur but, equally as much, in the diversity of the landscape. You glide from one entrancing scene to another; from towering hills, in places reaching almost the impressiveness of mountains, to gentle, far-reaching fertile valleys, where fattening herds are grazing on the rich grass. The beauty of high land and low land are both brought before the traveler in abundance, away from the noise of the busy city and where one is in

seated themselves. The proprietor presented each with a piece of tobacco. Having filled their pipes, these were lighted and the remainder returned to their pouches. The latter were made of a whole mole skin, with a slit at the top for an opening. After smoking and talking for a while together, one at a time arose, went to the counter and, taking up a yardstick, pointed to the first article he desired and asked the price. "How many buckskins for a shirt pattern?" "How much cloth for leggings?" according to their skin currency. A muskrat skin was equal to a quarter of a dollar; a raccoon skin a third; a doe skin a half and a buck skin the dollar in full. The Indian, learning the price of an article, paid for it by picking out and handing the merchant the required number of skins. While the first Indian was trading the others looked on without interruption. When he was done another took his place, and so on in rotation until all had completed their transactions with the merchant. No one desired to trade before his turn; he preserved a proper decorum and there was no attempt to secure a reduction in price. If dissatisfied the Indian passed on to the next article. By this method they inspired confidence, and we are told never paid more than a thing was worth. They were also careful never to trade when intoxicated, retaining their full faculties until business was over. It is said that this method was peculiar to Mt. Vernon and that vicinity. As one glides along in contentment over the smooth brick paved highway and sees the towering and majestic hills, it is easy, in imagination, to picture the Indians as still living among them, sitting before the wigwam, with the camp fire blazing merrily away.

Vast Increase in Travel.

One thing which is particularly noticeable, and of which the prosperous farmers along the road tell you, is the vast increase in the amount of travel since the brick pavement was laid. Where formerly an occasional automobile, or horse and buggy, passed over the old, twisting, uncertain dirt road, impassable at times of the year, hundreds of automobiles now go by daily, oftentimes in long streams, one hard upon the heels of another. This has added a cheer and contentment to rural life, which could not be had in former days. It has also brought many social opportunities denied before.

If the time is given two side trips can profitably be added to the schedule. Outside of Mt. Vernon, not more than a mile and a half, on a road leading to Mansfield, is the home of Dan Emmett. It is a modest frame building, but has a historical value. Emmett, one evening in New York, before the Civil war and while a member of Bryant's minstrels, composed the words and music of the melody "Dixie." It made him rich in fame, although adding little to his purse. Many visit the home every year.

Another trip of interest is Gambier, the seat of Kenyon college, one of the oldest and most noted institutions of learning in the state. This is away from the direct route, a few miles, but easily reached. It is located on a high hill, giving a commanding view of the surrounding country. A more romantic or delightful place can not be imagined. The buildings are, most of them, old and of Gothic architecture. At one end the main walk, a half mile long, where towering trees intertwine their branches the entire way, stands Old Kenyon; at the other Bexley hall, the theological seminary. Bishop Chase of the Episcopal church founded the college in 1826 and it was named in honor of Lord Kenyon, one of the principal benefactors.

A stop should be made at the academy of the Seventh Day Adventists, but a short distance beyond Mt. Vernon, on the way to Loudonville. It is the only institution of its kind in the state and stands boldly facing the splendid brick paved roadway, both testimonials to modern advancement.

Should the ride be one beginning at Columbus there is much of interest before Mt. Vernon is reached. You pass through Worthington, going over an excellent brick road. This is a beautiful village, speaking of antiquity and early events of Ohio's history in a hundred ways. A little farther on is Westerville, the seat of Otterbein college and headquarters of the National Anti-Saloon league. It is now becoming an important manufacturing center and growing, as brick roads reach out and make ingress and egress easy. Then, in turn, the ride passes through Galena, Sunbury, Condit, Centerburg, Mt. Liberty and Bangs. Centerburg authorities have paved all roads but one within the corporation and used only brick as a material.

If this route has been followed you have had a wonderful day; have seen scenery as entrancing as any in the country and, to make the end more perfect, have ridden over a highway paved with brick, representing the highest type of road construction.

Food Gelatin From Seaweed.

Scientists have discovered they can secure large quantities of food gelatin from the seaweed that is so abundant along the coast of Lower California and a new industry may be developed based on that discovery. The seaweed supplies a great quantity of colorless and nearly tasteless gelatin that is of high quality, the particular seaweed found so valuable being the variety known as gerideum, that grows in water from 10 to 20 fathoms deep and is gathered by divers working under the water.

Bulletin on Arsenicals Has Just Been Issued

Calcium Arsenate and Acid Lead Arsenate Compared.

(Prepared by the United States Department of Agriculture.)

A study of chemical, physical and insecticidal properties of arsenicals on the market was undertaken by the United States Department of Agriculture in order to gain a better understanding of them, to be able, if possible, to improve them, and to produce new arsenicals for insecticidal purposes. The results of this investigation are set forth in a new bulletin just issued by the United States Department of Agriculture as Department Bulletin 1147.

Paris green and lead arsenate, which have been standardized and found reliable for many years, have constituted the principal insecticides used against external chewing insects. However, during the past few years, the use of calcium arsenate has steadily increased, owing in part to the discovery that it is effective in combating the boll weevil. The manufacture of calcium arsenate although well beyond the experimental stage in most factories, probably will not be completely standardized for several years. Because of the importance and recent large-scale production of calcium arsenate, many of the results in this bulletin deal with comparisons of calcium arsenate and acid lead arsenate.

A copy of the bulletin may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

Practical Suggestions on Filling Silo in Fall

In cutting corn and filling the silo there are many things that can be done before the actual operation starts. Here are a few suggestions worked out by the farm department at Iowa State college:

See that the corn binder is in good working order.

Have plenty of good twine. It takes about six pounds to the acre.

Clean out the silo. If there is stagnant water in the pit, remove it.

See that silo doors are fitted properly. If any are out of shape, have them ready when the filling starts.

Keep hoops tightened, but do not turn them up so tight that the silo starts to dish in.

Get the cutter in shape. See that all bolts are tight and plenty of oil has been used.

Have a good supply of sharp knives. Improper cutting slows up the filling and makes poor silage.

If silo is partly filled with old silage, scrape off the top part until any spoiled silage is gone and then put the new silage on top. It will not hurt either the new or the old.

If corn is too dry, put water in it. If corn is green, water is not needed unless it is used to pack the silage.

Government Establishing Experimental Fur Farm

An experimental fur farm is being established in the northwestern part of New York state by the bureau of biological survey of the United States Department of Agriculture, in order that observations and studies may be made of the habits of fur-bearing animals and of the possibilities of growing them in captivity and producing fur of good quality. A similar farm which has been operated by the bureau at Keeseville, N. Y., will be discontinued as soon as the new one is ready. The new farm is located three and one-half miles from Saratoga Springs, N. Y., on the state highway to Corinth and is more easily accessible than the old, both by automobile and by bus line. The tract comprises 20 acres, of which approximately 15 are covered by an excellent growth of timber, and will furnish an ideal situation for the desired purpose.

"Government Whitewash" Best for Outside Work

Whitewash whiter than some, that lasts well on outside jobs, and that spreads so well that a pint covers nearly a square yard is being recommended for farm application by the New York state college at Ithaca under the name of "Government whitewash." The standard recipe given is: Slake one-half bushel of fresh lime with boiling water, covering the receptacle to keep in the steam. Strain the liquid through a fine sieve, and add seven pounds of fine salt, previously dissolved in warm water; three pounds of ground rice, boiled to a thin paste and stirred in; one pound of white glue, soaked first in cold water until swollen, then carefully melted over fire.

To this mixture add five gallons of hot water and let it stand covered for a few days before using.

Clean Packing Houses Will Prevent Diseases

Before starting the heavy pack of apples and pears, it is always desirable to give the packing house a good cleaning out. A grower should never keep decayed fruit of any kind in his packing house. Plums and peaches so left will often decay and brown rot will develop and the mummies will carry over the spores of brown rot, which will later attack the fruit brought into the packing house. Decayed apples and pears often carry over scab, which is a menace to the fruit.

The Sorbonne.
The Sorbonne is a famous college of the medieval University of Paris, founded in 1253 by Robert de Sorbon, chaplain and confessor of Louis IX, and devoted exclusively to the study of theology. As an institution of learning it enjoyed a European reputation from the Fourteenth to the Seventeenth century, but with the revival of learning its influence gradually declined. The Sorbonne was suppressed in 1790 and its property confiscated, but in 1808 it was reorganized by Napoleon I and became the seat of the Academie de France and subsequently (1816-21) of the faculties of science, theology and literature. In the chapel of the Sorbonne may be seen the tomb of Richelieu, designed by Lebrun, and executed by Girardon in 1694.

FRANK DENNIS FARM FOR SALE.

177½ acre tract, 6 room frame dwelling, good frame barn with metal roof, two good corn cribs and other outbuildings, well tiled and fenced with four good wells; located two miles west of Five Points on a good pike in Monroe township.

This is an ideal stock farm or it would make a nice country home. We are offering this at \$125 per acre for the next thirty days.

Terms to Suit Purchaser.

Possession given a short time after sale. Call or write,

Something of interest in want ads.

* * * * * AMUSEMENTS * * * * *

Bebe Daniels, who is known as "the speed girl of the movies," because of the speed roles she has played in pictures, has ample opportunity to gratify her craving for fast movement in her latest Paramount picture, "The Exciters," which Maurice Campbell directed and which comes to the Met theater next Monday. In the picture Miss Daniels as Ronnie Rand, chief of the "exciters," has the thrilling experience of riding an aquaplane, participating in a motorboat race, riding in an aeroplane and dashing madly about the Florida turnpikes in a speeding roadster.

"There are more speed stunts in this picture than in a half dozen of my former pictures," explained Miss Daniels. "When I got thru whizzing thru the air for scenes in the photoplay I was ready to sit still for the rest of my life. I don't think I will ever want to see a speed boat or an aeroplane again so long as I live."

Antonio Moreno, recently seen in support of Gloria Swanson in "My American Wife," is costarred with Miss Daniels in "The Exciters." He has the role of a young man of wealth who, to enjoy the thrills that accompany danger joins the United States Intelligence service and later identifies himself as a safe cracker, with a band of crooks in order to obtain evidence of crime. Believing him to be a real burglar Miss Daniels as Ronnie, true to her reputation as an exciter, marries him. Many interesting developments follow, and the climax is novel and dramatic. The supporting company is made up of several well known screen artists.

What He Meant.
It is probably unnecessary to explain that the druggist who displayed a sign, "Say it with a brick," in his window, was referring to ice cream.—Lynn Brown

KEEPS CHILDREN WELL AND STRONG

Lunch on Grounds

oct11woct11&13d.

Remindful of other days. Horse and buggy climbing a hill between Mt. Vernon and Loudonville over the smooth brick pavement, but doing it with greater ease than in the time of dirt and mud.

man, in the development of his resources, has well completed and, out of the latter, the highway has gained its standing, as an important artery of trade and business progress.

Recognizing that brick forms the most substantial, the easiest and most comfortable riding and the most economical, because of the low cost of maintenance, the highway has largely been paved with this character of surface covering. In such places as have been coated with other material, the difference in the comfort of transportation is so apparent that the long stretches of smooth and well laid brick are welcomed as adding to the pleasure of a trip, giving greater facility for enjoying the wealth of scenic beauty to be found on every side.

It is hardly possible to estimate the worth of the road from the standpoint of commercial value. This can best be gained by a ride over its long miles. Heavily laden trucks, bearing

close communion with nature.

The ride likewise takes you through a country filled with historical interest. Mt. Vernon, the seat of Knox county, is one of the earliest settlements in Ohio. It was laid out in 1805 and named by the proprietors of the soil, Joseph Walker, Thomas B. Paterson and Benjamin Butler. A peculiar thing which attracted these founders of the city was two wells, only a few rods apart, on the south bank of the Vernon river. They were built of neatly trimmed stone, laid in regular masonry and had the appearance of being overgrown with moss. The origin of the wells has always remained a mystery, but it is supposed they were built by Indians, who had lived in the vicinity for many years before. Shortly after the first settlement all traces of the wells were obliterated and, it is supposed, this was done by the Indians, in order that they might prove of no service

What the "Three C's" brick paved highway has done to increase and modernize traffic. Scene just beyond Mt. Vernon, on the way to Loudonville, but common to all parts of the road.

goods representing thousands of dollars, are passed at frequent intervals. The majority of this was formerly shipped by freight over railways. Realizing, however, that finely constructed brick roads offered greater inducements, since there need be no conformity to pre-arranged schedules, that the cost was less and the brick pavement minimized the danger of breakage in transportation, shippers more and more began to take advantage of the public highway. At present it has reached tremendous proportions and is steadily growing

to the white man, who were regarded as interlopers.

In the early days of Mt. Vernon the Indians, who lived in great numbers among the hills between that place and Loudonville, and through which the ride of today over the easily traversed brick pavement will carry you, came to Mt. Vernon to trade. They brought large quantities of furs and cranberries to exchange for goods. Their methods were unique and not lacking a certain element of shrewdness. Going to the only store they walked in deliberately and

GOOD ADVICE.
All that Circleville needs to start an industrial revival is for its citizens to forget self and join hands in a whole hearted movement in bolstering up industry.
If each person will forget petty personal jealousy, stop knocking and begin to boost in an effective manner the city can easily double its population in five years at the same time doubling the value of every foot of property in the city. Boost, don't knock.
James J. Hinde.

BUILDING LOT FOR SALE.
Vacant lot 50x160 feet located on North Court street belonging to C. F. Reichelderfer is offered at a very low price, if sold at once.
Circle Realty Co.
Phone 234.

Louisiana Purchase.
The United States government paid France nearly \$15,000,000 for Louisiana, although it was at the time still in the possession of Spain. Spain transferred Louisiana to France on the specific condition that she would never transfer it to any other government. England notified the United States that she would never consent to French occupation of any part of North America. Napoleon sold Louisiana to the United States to prevent it from falling into the hands of England. Technically speaking, France did not have a transferable title, and the territory was still occupied by Spain. But the latter country was in no position to object and so the bargain was made.

Partially Identified.
Sloan—"Did you ever meet a fellow down there with one leg named Sanders?" Doan (pondering)—"What was the name of his other leg?"

**Heavily Embroidered
Frock for Young Miss**

Navy blue, heavily embroidered in gold and red, makes this most attractive dress for the young woman for fall wear.

**How to Make Mirrors
Create Cheerfulness**

Adroit mirror usage in the small, rather shadowed hall creates an atmosphere of cheerfulness. Place within its range a bowl of pretty flowers, roses, or simple garden blooms and note the brightening effect that the reflection of their colors creates. From another angle the gay chintz hangings at one of the living room windows, glimpsed through the open door, are repeated in the mirror surface, supplying a vivid touch to the somber wall on which the mirror hangs. The value of a mirror in such a spot cannot be overestimated, so if your hall is a bit shadowy, by all means employ a mirror to give the needed brightening touch.

In rooms facing the north, in which the sun refuses to shine during the long winter months, use a mirror in conjunction with touches of orange or red. No colors bring such a warmth of tone as orange or red, yet they are infrequently employed, because they are so little understood. Let us suppose our choice for effect is orange, our bedroom and our wall covering putty tones. Hang the mirror above the black chest of drawers which shows as decoration narrow bands of orange. Choose an orange runner for the bureau top, softened at the end with blendings of old blue. Repeat these tints in the curtain hangings, and on the floor lay a two-tone blue rug. Introduce a predominance of orange in the chair cushions, and hang within range of the mirror a wall pocket of blue luster filled with a tangle of orange bitter-sweet vine. Border the blue bedspreads in orange, and then behold the result! The vivid orange will be repeated from every angle in the mirror's reflecting surface, bringing the glint of sunlight to add a welcome touch, but its vividness will not be overemphasized, thanks to the toning influence of the ebony and the softening shadows of blue.—Arts and Decoration.

**Crocheting, National
Time-Killing Sport**

A young and fairly intelligent married woman, on a yacht cruise, was observed by a male passenger to be busy with a crochet needle and a big spool of heavy thread making little wheels, which were put together to make big wheels, which in turn were to be combined some day in the grand sum total of a marvelous white bedspread, made of millions of stitches.

She sat, hour after hour, day after day, fingers flitting and eyes fixed on the work in her lap, oblivious to the beauty of the sky, water and forest. She had sailed presumably for a vacation outdoors. "I figured on making two of these a day," she explained proudly, "but I have done better than that. I may get the spread done in less than two years. I know a woman who was offered \$1,000 for one."

She didn't need the \$1,000, either. Her husband would have gladly given her that much to stop her eternal crocheting and take an interest in life. Not all women seem to be profiting by the new leisure they have won.—Norfolk News.

**Sleeves and Necks and
Effect of Cooler Days**

Only a hint of cold weather was needed to send arms under cover so far as women are concerned. Sleeves have appeared as if by magic, and even when short sleeves or sleeveless frocks were worn, arms that have been bare all summer are covered by gloves. Some compromised by the addition of little double puffs, two puffs to each arm, attached at the shoulders. These are of plaited georgette and come midway to the elbow. Sleeves on afternoon costumes in most instances are long and tight, coming well over the hand, as the Paris mode prescribes. Neck lines, however, continue to follow the canoe type with open gunwales—that is, the hem stands well away from the neck and shoulders. Sometimes a standing collar is a feature.

The Fast Age.
"The world never moved so fast before," mused Mr. Simmons. "We have winter ice on the Fourth of July, spring vegetables on Christmas; we buy our straw hats in February and our felt hats in August; we get our Sunday paper on Saturday night, and our magazines a month ahead of time. If we telephone a man in San Francisco from New York, he hears our voice about four hours before we speak; and if some one in Japan sends us a cablegram tomorrow, we get it today."

APPLES! APPLES!

Unwritten Book of Dreams.

Ossian was the Homer of my earliest years; to him I owe somewhat of my melancholy as a painter. This is the sorrow of the sea. I very rarely tried to imitate him, but involuntarily I assimilated the vagueness, the dreaminess, the self-annihilation in reverie, the eye that contemplates confused apparitions far away. Ossian was for me an ocean after tempest, on which something was floating under the light of the moon, where figures of young girls seemed lifting their white arms and spreading out their wet hair upon the foam of the waves, where I heard plaintive voices interwoven with the moaning of the waters upon the reef. Ossian is the unwritten book of dreams and the pages of it are covered with enigmatical characters on which my eye rested as I wrote and rewrote my own poems, as a dreamer may compose landscapes out of the motions of the clouds.—Lamartine.

The Wonderful Horse.

Oh, horse, you are a wonderful thing; no buttons to push, no horn to honk; you start yourself, no clutch to slip; no spark to miss, no gears to strip; no license-buying every year, with plates to screw on front and rear; no gas bills climbing up each day, stealing the joy of life away; no speed cops chugging in your rear, yelling summons in your ear. Your inner tubes are all O. K. and, thank the Lord, they stay that way; your spark plugs never miss and fuss; your motor never makes us cuss. Your frame is good for many a mile; your body never changes style. Your wants are few and easy met; you've something on the auto yet.—H. R. Elliott, in the American Forestry Magazine.

Left-Handed.

Do left-handed people differ from other people? An eminent physiologist says left-handedness means an abnormal sex balance, that the right side is the predominantly sexual one, and that, consequently, left-handedness means in a man more or less effeminacy, and in a woman more or less masculinity. Watch a man clasp his hands. A left-handed man will have his left thumb on top, and will be in some degree or other effeminate. Again, watch a woman manipulate her hairpins. If she uses her left hand, her character will show the relative masculinity. At least, so says the Austrian scientist.

What and Where is Atlantis?

The name is that of an imaginary island of vast extent lying in the Atlantic ocean off the Pillars of Hercules. It is said that an Egyptian priest first told Solon of its existence. It is mentioned for the first time by Plato in the Timaeus and Critias. He gives a glowing account of the land, and enriches it with a fabulous history. "About 9,000 years before his time the island is said to have been submerged by an earthquake, sent as a punishment for the wickedness of the people. Some authorities have identified the Canary islands with the lost Atlantis, while others hold the story to be a fable.

Queer Dusun Customs.

Many things are tabooed among the Dusun tribe on the island of Borneo. A man may not mention his own name, that of his father, mother, mother-in-law, or father-in-law. It is forbidden, or at least it is unwise, to point at the rainbow, because the finger which is pointed will rot away. There is a general belief in the existence of tailed men, who are said to be cannibals. Giants called Tempulalongi figure largely in the folklore of the people. These seem to be supernatural beings, who have a liking for visiting burial places and calling on the dead to rise from their graves.

A "Piece" of Sea.

I want awfully to tell you, today, about a little "piece" of green sea, and gulls, and clouded sky with the usual golden mountain-breaks to the southward. It was wonderful, the sea near at hand was living emerald; the white breasts and wings of the gulls as they circled above—high above even—were dyed bright green by the reflection. And if you could only have seen, or if any right word would only come to my pen to tell you, how wonderfully these illuminated birds floated hither and thither under the gray-purple of the sky!—R. L. S. in "A Letter."

Luck at Cards.

Many card players are particular about the cut of the cards. They must be divided and put back with the most meticulous care. A slovenly cut brings good luck to the dealer and bad luck to the cutter. Some imagine that special tables or positions at the tables are lucky to them, and refuse to play unless they can get the places they desire. Others conceive that certain members are unlucky to them, and nothing will induce them to play with them. To drop a card on the floor when playing is generally regarded as a bad omen.

Swallow's Nests as Medicine.

The Chinese highly prize the swallow's nest for its supposed medicinal value. The doctors of China regard it as a tonic capable of restoring a patient's lost vigor, and it is also said to be efficacious in curing lung diseases and smallpox. As a table delicacy the article is also highly considered, and a sumptuous Chinese dinner is not complete without a dish of this, to the celestial taste, palatable food. Swallow's nests are rich in albuminous matter. They are produced chiefly in the vicinity of the Malay Archipelago, such as Borneo, Sumatra, Java and the Philippines.

GOOD PROGRAM

At Mt. Pleasant W. C. T. U.—November Meeting With Miss Jones.

The Mt. Pleasant W. C. T. U. met at the home of Mr. and Mrs. Luther Kern Wednesday evening, October 10. The membership was well represented and ten visitors present. The program was:

Song—Count Your Blessings

Scripture Reading

..... Mrs. Harriet Helwage

Lord's Prayer in unison

Roll Call

Team Report Mrs. Minnie Kegg

Reading—Safety and Happiness Depend Upon Obedience to Law....

..... Mrs. Fannie Sampson

Piano Duet

..... Mrs. Allemand and Miss Ruth Gerhardt

Reading—Reasons Why the Prohibition Law is not Adequately Enforced Everywhere and Suggested Remedies Miss Bertha Jones

Piano Solo

..... Mrs. Luther Kern

Reading

..... Mrs. Minnie Kegg

W. C. T. U. Benediction

All remained for the social hour during which the hostess served sandwiches, chicken salad, ice cream angel food cake and coffee.

The November meeting will be held at the home of Miss Bertha Jones.

Fearful and Wonderful.

Helen's mother had told her that her legs and arms were like the limbs of the tree and her body like the trunk. One night Helen bumped her knee and running into the other room cried: "Oh, mamma, I hurt the limb of my suitcase."

Subscribe to the Hinde Paper Box company and let us help get the Fibra container business started here which will grow very rapidly bringing other lines of business with it.

SHERMAN GREEN DEAD.

Sherman P. Green, 50 of 365 Wilson avenue, Columbus, died Saturday. He is survived by two sons, Clyde C. and Carl W. Green and three daughters; Mrs. Charles Jester, and Misses Anna R. and Coral M. Green; two brothers and four sisters.

Funeral services Tuesday forenoon at 10 o'clock at the home. Burial in Amanda cemetery.

TO GET ACCUSED.

Deputy Sheriff Howard Irwin went to Bellaire to bring back Elmer Darst indicted on the charge of burglary and larceny. Darst was out on bond, but failed to come back when his case was called in common pleas court.

Small Savings Important.

Small savings are like stones in a bridge; they build a firm support to carry one over the flood of an emergency.

DANCING

MEMORIAL HALL

FRIDAY NIGHT, OCTOBER 19

EVERYBODY WELCOME

15octd5.

SOCIAL CALENDAR

Mrs. Charles Mason will entertain Tuesday evening in honor of Miss Helen Leist, a bride-elect.

Misses Virginia Shulze, Louise Renick, Mary Marfield and Bess Frey, of this city, and Miss Eleanor Jones, of Washington C. H. motored to Washington, Pennsylvania, Saturday to witness the Washington and Jefferson college eleven play the Brown university team. The former won by the score of 12 to 7. The young ladies were guests of Rufus Short, George McCrea and Donald Morris, students at Washington and Jefferson college.

BORN

To Mr. and Mrs. Lawrence Goodman
Circleville township, Saturday, October 6, 1923, a daughter.

The "Seven Senses."

According to Ecclesiasticus, 17:5, man is endowed with the senses of seeing, hearing, tasting, feeling, smelling, understanding and speech. The last two are not, of course, "senses" in the scientific meaning of the term.

DANCE

C. A. C. gym Pumpkin Show October 17th to 20th. Every night at 8 o'clock and Saturday afternoon at 2 o'clock. Music by the Society entertainers. 11octw1. 15octd3.

EXAMINATION MUNICIPAL CIVIL SERVICE.

The Municipal Civil Service Commission will hold an examination on **WEDNESDAY, OCTOBER 31, 1923**, at 7 o'clock P. M., in the council chamber in the City of Circleville, Ohio, for the positions of:
Chief of Police.
Patrolman.
Chief of Fire Department.
Fireman.
Blank applications may be secured at the office of the secretary and must be filed with him not later than 7 o'clock P. M., Saturday, October 27, 1923.
Circleville Municipal Civil Service Commission.
GEO. P. FORESMAN, Secretary. 15octd15.

PUMPKIN SHOW

OCTOBER 17, 18, 19, 20, 1923.

CIRCLEVILLE, OHIO.

STYLE FAVORITES ARE PLENTIFUL AT

FRIEDMAN'S
APPAREL FOR WOMEN

Each and every mode is a triumph of refined smartness. Above are some of the new arrivals in striking original designs, fashioned in materials that lend themselves gracefully to the individual figure. They are in many types from the utility coat to the most sumptuous befurred, wrappy models.

THE STYLES

The silhouette varies from the slender lined type to those of the richly fur trimmed wrap-arounds 46, 48 and 50 inches in length.

THE FABRICS

Rio de Laine, Nubian, Arabia, Fashiona, Velvete. Camels Hair, Velours and Polo Cloths.

THE PRICES ARE AS USUAL

CHEAPER THAN ELSEWHERE

AUTO ACCIDENT

Mrs. Samuel Denman Seriously Injured and Husband Badly Bruised.

Mr. and Mrs. Samuel Denman, who live at 1510 Aberdeen avenue, Linden, a suburb of Columbus, were seriously injured when the machine in which they were riding was struck by a southbound Columbus, Delaware & Marion traction car two miles north of Worthington Sunday.

Mrs. Denman's left leg was broken in two places by the crash; her right leg was lacerated and she suffered internal injuries. She was removed to the White Cross hospital.

According to Mr. Denman, they had driven to the home of a friend two miles north of Worthington. Tracks of the Columbus, Delaware and Marion line run directly before the entrance to the yard of the friend's home. Mr. Denman said, and in driving into or out of the yard, the tracks must be crossed.

Finding the friend not at home, Mr. Denman said he started to drive out of the yard and failed to notice the approach of the interurban.

The auto was nearly across the track when struck by the car.

Mr. and Mrs. Denman formerly lived in this city. He, at one time, was in charge of the Scioto Valley traction station. He is a brother of Harry Denman, employed by the Water Works company.

A LESSON LEARNED.

"Prosperity," said Lincoln, "is the fruit of labor; property is desirable; is a positive good in the world. That some should be rich shows that others may become rich, and hence is just encouragement to industry and enterprise. Let not him who is homeless pull down the house of another, but let him work diligently and build one for himself, thus by example assuming that his own shall be safe from violence when built."

Prophetic voice! Lincoln knew what it means to labor against almost insuperable odds; he was a child of the soil, a child of the people to whom toil was an inheritance; but he did not, through his glorious constructive life, look with envy upon the material success of his fellows. He did not advocate the tearing down the house of another, but proceeded to erect his own, to carve out a career that forever will stand as a marvel before the gaze of the world.

Lincoln was wise with a calm wisdom, the wisdom of love and charity of realization and consideration, of experience and reflection, of observation and practice.

America has learned well this great lesson submitted by the martyred President. The nation opposes it confidently to the screeds of those who would offer in exchange a wisdom presumptively wiser than that of the man who declaimed "with malice toward none, with charity for all."

And this elimination of malice, this unrestricted outpouring of charity, was, in Lincoln's view, to be applied to the economic as well as to the political and spiritual problems of the nation.—Cincinnati Enquirer.

Bell That Worked Miracles.

Many tales of the supernatural are told concerning evil spirits and the efficacy of bells in warding them off; likewise regarding the power of consecrated bells for bringing blessings. In an old chapel at Killin in Perthshire, Scotland, was a bell called that of St. Fillan, which had the reputation of curing lunacy. After the sufferer had spent a night in the chapel he was in the morning placed with great solemnity under the bell, and in many cases recorded in the old chronicles the faith was rewarded.

One hundred and sixty-nine people will be given steady employment at the Hinde Paper Box company's new plant. Subscribe now and let us help them get it started.

NOTICE TO CREDITORS TO CONSIDER COMPOSITION.
In the District of the United States,
For the Southern District of Ohio.
In the Matter of
The Home Trade Company, Bankrupt.
IN BANKRUPTCY.

Notice to creditors to consider composition offered by Bankrupt:
Take notice, that a meeting of the creditors of the above named bankruptcy will be held at the office of the undersigned, rooms 5 and 6 Masonic Temple, Circleville, Ohio, on Friday, the 26th day of October, 1923, at 10 o'clock in the morning for the purpose of considering a proposed composition made by said bankrupt to creditors in satisfaction of the unsecured debts, (not entitled to priority) owed by said bankrupt to each of said creditors which proposed composition is to pay 25 per cent.

H. B. WEAVER
Referee in Bankruptcy.
October 15, 1923. 15octd3.

PLAN NEW SPAN ACROSS NIAGARA

Latest Structure Will Be for Use of Railroads Only.

RECALLS BUCKET AND CABLE

Another new steel arch bridge is to be built across the Niagara gorge to connect Canada with the United States. It will be the third bridge of that type erected at Niagara, but the fourteenth bridge to span the river at that point. It will be for railway purposes only, and more massive in construction than either of the two steel arches now standing.

Ground has been broken. On both sides of the river men are at work stripping away the river bank and the face of the cliffs preliminary to the building of abutments on which the legs of the arch will rest. The abutments will be four in number, two on each side of the river, built of concrete and faced with rock. Into these will be sunk the rods and plates to be used as anchorages, and great holes also will be sunk in the sides of the cliff for other anchorages.

Much excavation is necessary to clear the site, and on the New York bank of the river a great steam shovel has been lowered over the cliff to bite away the rock and dirt, undisturbed for centuries, ever since the Horseshoe fall went by as it plowed through the gorge from the high escarpment at Lewiston to the point where it now affords a scenic spectacle of falling waters unrivaled in the world.

Each bite of this steam shovel is dropped into a chute, which spills the dirt and rock into the river right at the beginning of the Whirlpool rapids and far outside the tracks of the Niagara Gorge railroad, over which a protecting shed has been erected of huge timbers so that no harm may come to the thousands who patronize the scenic route. The dumping of this rock on both sides of the river will have the effect of narrowing the channel at a point where it is none too wide to carry away all the water that plunges over the falls, as well as that diverted for power purposes and returned to the stream in the gorge near the falls. Out in front of the spot where the bridge work is going on the river is only 85 feet deep and rushes by at 23 miles an hour as it swings the flood of the torrent into the whirlpool rapids.

This new bridge is to have a span of 640 feet in its main arch, compared with 550 feet of the present railway arch and 840 feet of the arch two miles up the river close by the falls. At each end of the main arch there will be a truss span of 100 feet, extending to the high bank. On the New York side there will be an approach span of 101 feet and on the Canadian end another of 51 feet.

To Carry Two Tracks.

About 10,000 tons of steel will be needed and the bridge will be designed to carry a load of 7,000 to 8,000 pounds per running foot on each of the two railroad tracks. The bottom of the arch will rise 207 feet above the normal water level of the river below. The site selected for the bridge is between the lower steel railway arch used by the trains of the Canadian National railway and the cantilever bridge over which the trains of the Michigan Central cross the river. It is being erected to supplant the cantilever bridge, which will be torn down when the new arch is ready. This cantilever bridge is the only one of the type erected at Niagara. It was originally built in 1883 and has been strengthened since then, but no longer meets the need of the trains of today. All the foundation work is to be completed this year in order that the erection of steel on the bridge proper may go forward next year.

When the railway steel arch was built in 1897 it was erected beneath the old railway suspension bridge at that point. Day by day the work went on and the arch grew in size without any interruption to traffic on either deck of the old bridge, the load having been shifted from the old to the new structure. The same methods were followed with the upper steel arch near the falls, which took the place of a steel suspension bridge in 1897-98.

This new arch will be the first of its kind erected at Niagara on a new site without the help, if much help there was, from an overhanging bridge of the suspension type.

There is a wealth of story in the Niagara bridges. In the latter part of the 40's the trend of empire was westward. Stages carried the pioneers to the Niagara border, where the great gorge and rushing river were obstacles to progress. It was necessary to detour miles up or down stream to cross by boat. The necessity of a bridge was apparent. Engineers enlisted the aid of small boys to make connection between the cliffs by kite strings. Homan Walsh dropped his kite on the New York bank after flying it high in Canada. Young Walsh lived on the New York side and to win it was necessary for him to go across the river in the ferryboat near the falls and walk two miles down stream to the proposed bridge site. On the first attempt he succeeded in dropping the kite, but the string hung so low that it was caught by the ice floe in the river and broken, and so heavy was the flow of ice that for eight days Walsh was unable to cross the river.

Soon after that he tried the feat again and won success with his kite, the Union. The slender kite string served to draw a heavier line across the gorge, which in turn was followed by heavier ropes and cables. On the cableway so formed an iron basket, now in possession of the Buffalo Historical society, was operated, and passengers carried at \$1.25 a head. This cableway helped build two bridges or platforms, one on each side of the cableway, each three feet wide, over which crossings were permitted by foot at 25 cents for each person. While the second aerial bridge or platform was being built a windstorm swept down the gorge and wrecked it. Six men were working there at the time. Two reached shore, but the four others swung between the river and sky with only two strands of No. 10 wire to support them. It was then that William Ellis went out in the iron basket with a ladder, which he placed as a bridge between the basket and the platform on which the men were, and over which they crossed to the basket and safety when they were drawn ashore.

Early Building Efforts.

The two platforms or bridges were used to assist in the building of another bridge, which gave way to the old wooden railway suspension bridge, completed in 1855. It was over this bridge that the locomotive London crossed the river on March 8, 1855. The way people of those days looked upon the completion of the bridge and the iron horse traffic made possible between the two countries was described by one man who witnessed the crossings on Sunday, March 18, 1855, and wrote:

"Awful violation of the Sabbath by long trains of freight cars with multitudes of men on top of them crossing and recrossing the bridge and shifting the freight will not soon be forgotten by those who revere the holy day. The curse of God will rest on this bridge is my firm belief."

It was on March 19, 1856, that the first passenger train, drawn by the engine David Upton, with Upton himself as a passenger, crossed the bridge.

The lower deck of this bridge was used for foot and carriage travel and at each end of the bridge a sign reading as follows was posted:

"A fine of \$50 to \$100 will be imposed for marching over this bridge in rank and file, or to music, or by keeping regular step. Bodies of men or troops must be ordered and kept out of step when passing over this bridge. No musical band will be allowed to play while crossing except when seated in carriages or wagons. Five dollars fine for every horse driven over this bridge at a faster rate than a walk."

"Five dollars fine for allowing teams or horses to stop on the bridge longer than absolutely necessary."

"The above fines will be rigorously exacted in all cases when the rules have been infringed."

Traffic across the bridge grew heavier year by year and in 1880 the old wooden truss gave way to a steel truss, and six years later the stone towers were replaced by others of steel. The present steel arch took the place of the suspension bridge in 1897. Bridge building two miles up the river in front of the falls did not begin until 1868, and the first suspension bridge was opened on January 2, 1869. It was a narrow bridge, the longest over the gorge, of wood, and picturesque in its slenderness. In 1888 it was replaced by a wider bridge of steel, but before this bridge was a year old it was destroyed by a windstorm on the night of January 9, 1890. In May of the same year a duplicate of the ruined bridge was opened to travel and gave service until 1897-98, when it was replaced by the present upper steel arch over which trolley cars cross to Canada and return.

BEARS MAKE RAIDS ON FARMS

Residents in Pennsylvania Face Serious Problem.

Black bears are becoming so numerous along the Highland road a few miles from Kane, Pa., as to prove a serious problem to the farmers. The farms which line these roads are all near large tracts of forest lands, where wild game abounds and under the protection of the state laws the animals are becoming so tame in many instances that the farmers declare they are nuisances.

While members of the family of Juan L. Gaston, living on a farm near the hamlet of Highland Corners, were sitting on the porch, during the early evening recently, they heard a commotion in the barnyard a few hundred feet away. Horses were neighing, cattle lowing and hens cackling.

Investigation showed a large black bear making its escape across the fields in the woods after having knocked over a beehive and scooped out the honey. The family of C. W. Fairweather, living about a mile from the Gaston place, on a number of occasions have chased bears from their chicken house.

Find Razor Blades in Loaf of Bread.

Accused of selling bread in which razor blades were found, Peter Klerer, a New York city baker, was haled into court at the request of Mrs. Mary McKlen. The judge ruled that razor blades were not mentioned in the sanitation code and released the baker.

Shoots Gun From "Cop's" Hand.

Confronted by a pistol in the hand of a policeman who caught him robbing a store at New York city, a man shot the gun out of the officer's hand and escaped. The officer was not even scratched by the shot.

PERSONALS

Milt Morris was a business visitor in Columbus today.

Joe Wolf went to Lancaster today to ship his horses home.

D. Winter Newhouse was a business visitor in Columbus today.

John Pemberton of New Holland, was a business visitor in Columbus today.

Misses Hazel Greeno and Ruhama Myers spent Sunday in Columbus with friends.

Harry Yates accompanied by his guest, William Murphy, were business visitors in Columbus today.

Samuel Fullen visited his mother, Mrs. Frank Fullen, at St. Anthony's hospital in Columbus today.

Edward Hass, of Cleveland, a student at the O. S. U. was the guest of his roommate, Alonzo Marion, over Sunday.

Miss Genevieve Sensenbrenner, a student at the Columbus Business College, spent the weekend with her parents, Mr. and Mrs. Edward Sensenbrenner.

Miss Lillian Van Heyde, of Cleveland, visited her aunt, Mrs. Ella Crites at Mt. Carmel hospital, Columbus, Sunday. Mrs. Crites is undergoing treatment for her eyes.

Miss Mildred Wertman and brother Kenneth Wertman, students at the O. S. U., were the weekend guests of their parents, Mr. and Mrs. George Wertman, in Washington township.

B. F. Yates went to Marion today to start the races for the Marion Trotter association. These races were to have been run in August, but owing to the funeral of President Harding were put off until this week.

Mr. and Mrs. J. S. Work, of Denver, Colorado, who have been visiting Mrs. S. W. Miller and other relatives the past summer, have started for the south touring thru Tennessee and Alabama and on to Florida.

Germany Not Poor.

Princeton, N. J., Oct. 15.—Germany is far from being in a state of poverty and is well able to pay reparations. President John Grier Hibben of Princeton university, who has just returned to America after an extended tour of Europe, said. He explained: "I did not find any evidence of poverty or unusual distress in Germany. The stream of population passed before me much as it appeared in the days of 1912, the time of my last visit to Berlin."

Kidnaped by Chinese Bandits.

Shanghai, Oct. 15.—Chinese bandits have captured J. Stamm, Standard Oil representative, near Luchow, and are holding him for \$2,000 ransom. The bandits threaten to kill Mr. Stamm if the matter is reported to the authorities. Four junks loaded with oil were taken by the bandits at the time Mr. Stamm was kidnaped. Rev. W. A. Hick of the China Inland mission, was shot through the neck and seriously wounded during the fighting for the possession of Chung King.

Players to Get \$360,000.

New York, Oct. 15.—Players of the New York American league and National league clubs, now engaged in the world's series contest, will split \$362,783.04, the winners getting 60 per cent of the pool. Saturday's game was the last in which the players figured in the gate receipts.

President Obregon's Condition.

Mexico City, Oct. 15.—Reports from President Obregon's physician at Lake Chapala, state of Jalisco, where the chief executive was taken to recover from a recent illness, indicate that while his throat trouble has been partly conquered, his main affliction is heart trouble. Obregon's condition, while not reported as serious, has caused considerable apprehension in political circles, while recent bulletins from Lake Chapala are not optimistic.

NEWS BRIEFS

Appointment of J. D. Taylor as acting prohibition director of South Dakota to succeed Director William O. Knight, resigned, was announced at Washington.

A fort of the Warsaw (Poland) citadel, in which explosives were stored, blew up, causing great damage in the city. Twenty-eight persons are known to have been killed and 100 injured.

French aviator Maneyrol, competing in the motor glider contests at Paris, was killed when the wings of his plane gave way.

Three children were burned to death when S. C. Garden's store at Phoenix City, Ala., was destroyed by fire.

Fire destroyed a block in the business section of Nogales, Sonora, on the Mexican border.

One hundred and eighty local people have subscribed to the Hinde Paper Box company \$25,200. Subscribe now and help get this fine industry started.

STARS ARE PUT TO MANY USES IN EVERYDAY LIFE

Smithsonian Institution Report Describes Recent Achievements of Scientists.

Among the recent developments and achievements in the scientific world, described by the Smithsonian institution in the latest of its reports, just out, are the many uses to which the stars are put in everyday life.

Dr. W. W. Campbell, of Lick observatory, writing on "Daily influences of astronomy," gives many of the interesting facts of the astronomical knowledge and tells of the application of certain of them.

For example, observations of the stars are supplying all nations with accurate time; accurate maps of continents and islands depend on astronomical determinations of their latitudes and longitudes; in America, boundary lines between nations are fixed by observations of the stars; the sailing of ships over long courses determined from the work of astronomers.

The age of the earth is discussed in an article by Lord Rayleigh and several other scientists, each considering the problem from the point of view of a different science. From a study of the rate of decomposition of the radioelements, Lord Rayleigh deduces a length of time of about 2,000,000,000 or 3,000,000,000 years in that the earth's crust has been suitable for the habitation of living beings.

Among the various anthropological papers in this Smithsonian report is a discussion by Dr. Ales Hrdlicka, of the United States National museum of the color of eyes, hair and skin among old American families in which there has been no admixture of foreign blood for three generations or more.

The observations were made on nearly 2,000 individuals, male and female, from north and south and of varying ages. Among the many conclusions reached the following are perhaps of most interest:

Two-thirds of the males and three-fourths of the females showed skin that may be classed as medium. In only five per 1,000 in males, but fifty-two per 1,000 in females was the skin plainly lighter than medium. Only one among sixteen males and one among fourteen females has real blond hair. In approximately 1 per cent in males and but a little more in females the hair was fully black. In 2 per 100 of males and five per 100 of females the hair is red or near red.

YOUNG TIGER RULES HOTEL

If He Did Nothing Else, He Had the Bell Hops Hopping.

A full fledged, though not full grown, Honduran tiger, being entertained at a New Orleans hotel, was the innocent cause of terrorism spreading among its corps of bell hops.

First intimation received by the hotel authorities that there was a guest in one of the rooms whose name was not on the register came when one of the bell hops, three full shades paler than his usual dusky complexion, came loping down from the second floor several steps at a time to announce that there was "a fightin' will cat in room 254."

Investigation disclosed that the room was occupied by Charles A. Toce and William C. Miller of Lake Charles, La., who returned from Honduras, and the three-week-old kitten, which was captured by the two men during a hunt for big game in the jungles near San Pedro, Sula. The animal will be presented to the New Orleans zoo.

MEASURE COSTS BY MINUTES

Austrians Now Work Four Times as Long for Loaf of Bread.

Austrian government employees, fighting to gain payment for their labors sufficient to maintain their families, have presented their case in a novel way. Instead of relating that in the old days they could buy for five crowns what now costs them 50,000, they have used minutes of labor as a measuring unit and produced an interesting table.

In 1914 a loaf of bread cost 12 1/2 minutes of labor. Today the cost is 49 minutes. A measure of sugar that cost 26 minutes nine years ago now calls for 102 minutes. Coal has risen from 1 hour and 18 minutes to 12 hours and 36 minutes, and a pair of shoes from 6 hours and 18 minutes to 19 hours and 30 minutes.

GUESS CHINA'S POPULATION

Post Office Estimates 436,054,953 Persons Live in Provinces.

China has a population of 436,054,953, according to the annual report of the Chinese post office at Shanghai. The figure is only a vague estimate, compiled from reports of provincial offices, as no systematic method of census taking is followed in China outside the foreign concessions.

Sze Chwan, in the western part of China, is the most populous province, being credited with having 49,732,810 inhabitants.

Honan, Shantung and Chihli provinces follow in the order named, each having more than 30,000,000 population.

Tibet Now Has Telegraph.

Tibet, heretofore regarded as one of the most isolated countries in the world, has now been connected by telegraph with India.

Hotel Stenographer

BY ROE FULKERSON

"No more touring for little sister," exclaimed the Hotel Stenographer. "Did you do it?" asked the House Detective.

"Once!" said the girl, "and if I never do it again. It will be plenty soon enough for me. You know my friend, Toots Shaughnessy, bought a flivver. Well, she's got a pair of goggles and a pair of khaki pants, and she thinks that with those two pair she can open any highway pot on earth."

"We left here Saturday night, and camped late at a spring down the road some place and, after we had made our beds, a cow stepped on Myrtle."

"We got to the shore Sunday and stayed in swimming so long it was almost night before we left. We drove 20 miles towards home and the road was so rough and we were so scared we decided to camp for the night. We drove into what looked like a school-house yard and parked the flivver and got out our bed rolls and went to sleep. Mind you, Kelly, we went sound asleep. We were all mighty tired and nobody woke up until it was daylight and what do you think?"

"We were in a graveyard with tombstones sticking up yithin ten feet of us. We threw the bed rolls into the flivver and, without waiting for breakfast, or anything, we came away from there 30 miles an hour."

"Man, Sir, think of it! We slept in a graveyard. We left the tire pump and of Toots' tools, but decided we would rather buy new ones than go back after them."

"But," said Kelly, "nothing hurt you."

"You are crazy," said the girl, "didn't I tell you it was a graveyard?"

Halloween Superstitions.

In the north of England the country people were so afraid of evil spirits coming to earth on Halloween that they built huge fires and stood on guard to see that no witches sneaked in around the flames. Some even believed if they braided straw, fastened it to a pitch fork, then set it on fire and waved it in the air, they could ward off the attacks of witches.

Notice Of First Meeting Of Creditors.

In the Matter of The Home Trade Company, Bankrupt. IN BANKRUPTCY.

To the creditors of The Home Trade Company, of Circleville, in the County of Pickaway and District aforesaid, bankrupt:

Notice is hereby given that on the 11th day of October, A. D., 1923, the said, The Home Trade Company was duly adjudicated bankrupt; and that the first meeting of the creditors will be held at the office of the undersigned, rooms 5 and 6 Masonic Temple, Circleville, Ohio, on the 23d day of October, A. D., 1923 at 10 o'clock in the forenoon, at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting.

EMPLOYMENT FOR MANY.
Every person in Circleville realizes how badly the city is handicapped by the lack of permanent all-year-around industry.

The Hinde Paper Box company it started here will employ 140 people at the start and more in the near future, paying liberal wages.

Subscribe now and boost this excellent project along.

The East.
And then I saw the men of the East—they were looking at me. The whole length of the jetty was full of people. I saw brown, bronze, yellow faces, the black eyes, the glitter, the color of an Eastern crowd. And all these beings stared without a murmur, without a sigh, without a movement. . . . Nothing moved. The fronds of palms stood still against the sky. Not a branch stirred along the shore, and the brown roofs of hidden houses peeped through the green foliage, through the big leaves that hung shining and still like leaves forged of heavy metal. This was the East of the ancient navigators, so old, so mysterious, resplendent and somber, living and unchanged.
—Joseph Conrad, in Youth.

Sweet Talk at a Discount.
"Warmth and softness will never melt a girl's heart," sighed the young man who had tried to make an impression on a girl by saying sweet things. "I should say not," replied the fellow who had been jilted. "It is hardness and coldness that melt their hearts—diamonds and ice cream."
—London Tit-Bits.

TITLES MATTER OF COURTESY

Proper Terms Indicated for Addressing Sons and Daughters of Peers.

Some interesting points dealing with the legal positions of the sons and daughters of peers were given in a society paper some time ago. According to the writer, the eldest sons of dukes, marquises and earls are called by one of their father's second titles; but in the eyes of the law they are only esquires, and possess rank and coronet as a mere matter of courtesy.

It may be noted that the eldest son of a duke holds the same precedence whether he bears the title of marquis, earl or viscount; while the younger sons of dukes and marquises are called by courtesy "lords," and their daughters are styled "ladies," but legally they have no handles to their names, and are, in fact, commoners. Thus, "Lord John West" is by law plain "John West," and "Lady Alice West" is simply "Alice West." However, custom accords them honorable mention, and their letters must be addressed "The Lord John West," "The Lady Alice West." In the case of all these titles, from that of a duke downward, the "The" must never be omitted.

It must be remembered, however, that this is not the case with regard to foreign titles of nobility. A foreign baron or baroness, comte or comtesse, marchese or marchesa, should be addressed as "Baron Fernstein," "Comtesse Delorme," and "Marchesa Viria," and letters to them would begin "Dear Baron," "Dear Marchesa," and so on. The magic "The" must be omitted.

To return to the British peerage. The younger sons of earls and all the sons and daughters of viscounts and barons are styled "honorable," and of course, the sons' wives also.

To write "The Hon. Miss South" is incorrect; the Christian name should be used, and the letter be addressed: "The Hon. Sylvia South." An earl's eldest son who takes one of his father's second titles is styled "Viscount South" or "Lord South," but if he happens to marry the daughter of a duke or marquis the lady retains her own rank, which is higher than his, and thus becomes "Lady Grace South" and not "Lady South," as she would be if she were a commoner.

Peers sign the name of their title only, and never their Christian name. Thus the Duke of Somerset would sign a letter "Somerset." If the title happens to be a double one, the name is written in full, "Brougham and Vaux," "Mowbray and Stourton." And peeresses practically have no Christian name.

They sign a letter with the initial of their first name as a prefix to their husband's title. Thus Lady Derby would sign a letter "C. Derby."—London Tit-Bits.

Bible Thought for Today

THE EVER WELCOME MESSENGER.—How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace; that bringeth good tidings of good, that publisheth salvation; that saith unto Zion, Thy God reigneth!—Isa. 52:7.

Poverty and Splendor.
I saw many poor, whom I supposed to live in affluence. Poverty has, in large cities, very different appearances; it is often concealed in splendor, and often in extravagance. It is the care of a great part of mankind to conceal their indigence from the rest; they support themselves by temporary expedients and every day is lost in contriving for the morrow.—Dr. Samuel Johnson.

Hard "Situation."
A dusky chauffeur who recently brought the frame of a big truck from Detroit to Youngstown rode part of the way sitting on the gas tank, but the seat was so hard he soon became tired of it. "Ah don't see how you could stan' it, Henry," a friend observed. "Stan' it," Henry replied. "Mah goodness, dat's jes what Ah couldn't do nothin' else but."

THE WONDER OF THE AGE

THE HOT BLAST AIR TIGHT FLORENCE

NO SMOKE! NO SOOT! NO DIRT! NO CLINKERS! EVERYTHING IS CONSUMED.

At the end of the season's use with soft coal, there will be no soot in the pipe or flue

The Zenith of Stove Perfection

The only jointless leg bottom and base with full radiation and large ash pan that is on the market! or has ever been made in the history of the stove industry.

The jointless leg bottom and base makes the stove air-tight below the grate, which is the only true fire keeping principle.

It will be as good a fire keeper twenty years hence as it is today.

The Hot Blast Air-Tight Florence will heat twice the space that can be heated by any other stove on earth at one-half the cost.

The only perfect floor heater that is or has ever been made.

All features are patented and no stove manufacturer, dealer or user can copy or use same until the expiration of the patent without incurring liability for an action for damages.

THE HOT BLAST AIR-TIGHT FLORENCE burns soft coal or slack and all the smoke and gases. No filling up of the stove, pipe or flue with soot. No dirt inside or outside the house. It will burn hard coal and all the gases which escape from the hard coal base burner. It will burn wood and sawdust, wet or dry. It will produce one-half less ashes than any other stove on earth with any kind of fuel and leave no clinkers or half consumed fuel.

GERRY SHOWS HOW

By JANE JORDAN

(©, 1923, Western Newspaper Union.)

GERRY went back and sat down by the pool where fountains played. She was much discouraged and altogether disappointed.

Barry, her sweetheart from school-time days, was able to drive out to the White Farms each Saturday evening, and also to later drive his adored Gerry along the shore, in enchanted moonlight. Therefore, Barry was astounded, and disappointed in her decision. "Not going to White Farms?" he had asked amazed. Gerry fidgeted, but the truth came out.

"I want to know different people, Barry. Don't you understand? One makes one's friends and may one not cultivate prosperous friends as well as the ordinary? I'm going to stop for two or three weeks, if my money lasts, at the Hill Top house in the mountains, where Gwendolin Thayer spends her summers.

"Gwendolin Thayer!" Barry's tone was sarcastic. "So you are going to try to climb up to the haughty Gwen's position—in society. Why, dear child—" he dropped into the provokingly indulgent "Gwendolin's father has the money to buy her way. You can't get by among those Hill Top snobs—with an ingratiating smile."

Beyond the pool where Gerry sat, screened by sheltering trees, stood an invalid chair. Gerry had noticed this wheel chair and its bent and wrinkled occupant before. And she had conquered the impulse which urged her to speak to the lone old lady.

Gerry approached. "The sun shines through the leaves on your face," she said, and smiled her winsome smile. "May I push your chair—so?"

"Thank you, my dear." Here was a tone natural in its cordiality.

"You seem to be as alone, as I, in this gay resort. Loneliness may be expected by a sick old woman—but when one is young and—" the thin lips smiled, "and as good looking as you, my dear—why, loneliness is a crime. I have seen you day after day—tell me about it."

And to her own astonishment, Gerry obeyed the sympathetic request. She told of the determined trip to the mountains—of Barry and his discouragement—of the White Farms where she had been simply happy. Of the home, too, which death had severed, of her new departure then into the business world—of the painstaking saving for this! Gerry told it all; and the sharp glancing eyes of her listener drew her on and on. The wrinkled smile came again:

"And you hate to have Barry—the satisfied rascal—say 'I told you so.' I've never relished that sort of thing myself. Always liked to show 'em, too, my dear. And I have, a few times. Even since I've come to this. Surprising folks in a pleasing way is one of the few joys left me. This—" the invalid waved her hands across her prostrate form, "came of an automobile accident. And I'll not walk the rest of my days. I'm for staying comfortably at home, with a kind soul or two to care for me, but my son—and oh! he's a good son; he won't hear of it. So, when he has a business trip, like the one which brought him here, he brings me with him. Thinks the change of air does me good. My dear, are you to miss the fete this evening—a moonlight fantasy, with garlanded box seats on the lawn? The boxes cost enough, goodness knows. How the rich can spend!—and are no happier. But you, little Cinderella, are you to be alone, back among the trees—as usual?"

"I am to be alone," Gerry answered, and added, "unless you will let me keep you company."

"Thank you. That's kind again. But my son will be here and will be insisting that I let him draw my chair to a garlanded box to watch the tableaux. And as I'm a determined old woman I'll tell you what I'm going to have him do. I am going to ask him, as my special desire, to take you instead—so get out your prettiest dress. Warring is not a young man, but he's a handsome one. He is devoted to his work and finds no time for society of women. Some of them would seek it—you know of Miss Gwendolin Thayer? She would have had my son a guest tonight in their family box."

Gerry leaned forward; her soft laughter rippled. "Your son? I do not even know his name," she said.

"You will when you hear it," the elder woman answered dryly. "My son is Warring Webster, the sculptor. He is here in consultation. Warring is now at work on the Victory statue of the high mountain."

A man came smiling and bowing his way through the assembled guests on the lawn. He was a handsome man as his mother had said, and his eyes bright, glancing like hers, rested on Gerry's face.

"My little new friend, Warring," the old lady introduced her.

The fete was a beautiful achievement. Gerry remembered it long years after.

Barry, sitting in his dusty office, read the newspaper account next day.

"In box No. 1, Warring Webster, sculptor and well-known financier; Miss Geraldine Drew of Conover Town, his companion."

Barry's chair came to the floor with a jolt; he turned to the surprised friend who sat near him:

"I'm going to catch the 6:15 for Hill Top," said Barry, "and fetch that girl home."

IT PAYS TO ADVERTISE

NEW AREA IN FLYING NEAR

Inexpensive Transportation Fore-
shadowed by Remarkable Success
Attained by Motor Gliders.

A new era in air flying, that of cheap, safe, popular airplaning, is foreshadowed by the remarkable success attained by tiny British airplanes called motor gliders. One of these, a small monoplane fitted with a three-horse power engine, recently reached a speed of 53 miles an hour during tests near London. It climbed to 2,350 feet, and, although in the air for an hour and 20 minutes, consumed less than a gallon of gasoline.

French aviation experts also are perfecting similar "pocket-planes," intended for use by amateur aviators and sporting enthusiasts. In England a small "car with wings," capable of carrying its owner through the air at the speed of an express train with no more power than is required by a motorcycle, has reached such a practical stage that orders are being booked for it by the public.

Rising out of small fields and being wonderfully controllable in the air, these cheaply-run winged cars are to be made to alight so slowly that the risk of a crash on landing, even under adverse circumstances, will be practically eliminated. Furthermore, such machines will be so handy on the ground, and their wings will fold so neatly, that it will be possible to house them in ordinary motor garages.

It is expected that the owner of one of these machines will be able to make the trip from London to Paris and back, sweeping high over the channel and escaping all the irritations and delays of earth transport, for about \$5. A movement is now on foot to get motor-garage proprietors to set aside smooth-surfaced fields, marked clearly so they can be seen from above. In this way the drivers of little "air cars," when on week-end aerial rambles, will have points all over the country where they can descend and replenish their gasoline tanks, or make any necessary repairs or adjustments.

Must Guard Our Pheasants

The shots and shells of the World war are even now damaging the game birds of America, indirectly but none the less vitally. Lee S. Crandall, curator of birds of the New York Zoological park, in a report to the American Game Protective association warns that unless the few fortunate possessors of avian pheasants cherish and increase them during the coming breeding season all species are in danger of becoming virtually extinct. The industry of collecting and distributing wild birds and animals has been badly demoralized by the war and American breeders can no longer depend upon European importations for supply, he explained. The seed stock of many kinds of game birds and waterfowl has become dangerously reduced and even if it is possible to obtain fresh stock, the newly-imported, wild-caught birds often breed with great reluctance and years must pass before a prolific breeding strain can be developed from them.

Center of Goldfish Industry

What makes Philadelphia the center for breeding those rare and wonderful fish one sees in an aquarium? Experts tell me it is the center and regularly produces the largest crop of goldfish of unusual types and other strange kinds of what I may call toy fish. You will find the reason for this odd industry in those despoiled ditches which crisscross the Neck.

It seems that even a parlor fish thrives best on its natural food. Fish culturists know that and so they go down to the Neck and scoop up from these stagnant water-holes and trenches the larvae which to a fish are as beefsteak and baked potatoes to an athlete.

I have it from a sea captain who has been everywhere that here he finds the largest variety and best specimens of those fish which are meant to please the eye, but not appease the stomach.—Philadelphia Inquirer.

To Hunt Fossils in Patagonia

A five-year hunt for fossils of extinct species of mammals which appeared ages ago, will be begun soon, when Prof. Elmer S. Riggs, associate curator of paleontology of the Field Museum of Natural History, of Chicago, and three assistants will sail for Buenos Aires on the first leg of their expedition. After exploring the Argentine pampas, the party will strike northward along the Atlantic coast as far as the Straits of Magellan. In places the work will be along beaches where the ledges are accessible only a few hours each day. In the extremity of Patagonia, a land of strange legends and folk-story, the party will search for fossil remains of unique and much more ancient animals, which existed in South America in the ages when it was almost as widely separated from North America as Australia is now separated from Asia. This isolation accounts for strange fossils.

Acts to Save Animals' Teeth

The Royal Zoological society which runs the "zoo" in Regents park has a new curator and one of the first things he did when he assumed office was to put the apes on a diet of hardtack so as to save their teeth, which were becoming loosened on a diet of bananas, potatoes, oranges and bread. The trouble seemed to be a loosening of the teeth like pyorrhea. The unwilling boarders at the zoo take to the hardtack and seem to prefer it to the soft food.

CEYLON IS LAND OF WALKING FISH

Famous Cinnamon Gardens of Colombo Given Over to Park and Home Sites.

Washington.—A land where fishes walk along the roads and climb rocks and trees, where crabs fling sand into the air and elephants play tricks like sportive children—such, says a bulletin from the National Geographic society, is Ceylon, where Great Britain is negotiating with the natives concerning important government reforms. "Colombo, the present capital," continues the bulletin, "has a magnificent artificial harbor built by the British. That city superseded the former principal seaport, Galle. In the new port city the native quarter, with its beautiful Sinhalese girls, its jewel grinders and lace makers, contrasts sharply with stately government buildings and European customs of the English section.

Ancient Wonder-City

"The famous Cinnamon gardens, where the Dutch formerly cultivated that spice in enormous quantities, today are given over mainly to a park and bungalows and here houses of well-to-do residents nestle in bowers of wondrous beauty and sweet perfume.

Scanty remains of the ancient capital, Anuraghapura, lie in lofty mountains amid matted jungle growths. Glowing descriptions of this ancient wonder-city by Arab, Persian and Greek voyagers led to the excavation work, now going on, which has been slow because of its vast size.

"Near by is the sacred mountain of Mihintale, with its huge irrigation tanks, one of them begun five centuries before the Christian era. This tank covered 40 square miles with its waters when it was new.

Buddha's Enormous Tooth

"Kandy, the last native capital, sets picturesquely above the blue waters of a little lake, also artificial. In making it the native ruler ruthlessly drowned out scores of his subjects' rice fields. Hidden in gold and ruby-encrusted bell shrines a mythical 'tooth of Buddha' is preserved.

"The present 'tooth' obviously could not have grown in any human mouth—it is two inches long and half an inch thick at the base. The visitor forgives the fiction for the sake of the August night celebration, when the tooth is carried about the town accompanied by a procession of devil dancers in their grotesque masks.

"Adam's Peak, a strange mountain top where a huge natural depression resembles an enormous human foot, also is an object of veneration. From this mountain Buddha is supposed to have ascended to heaven. Millions of devout pilgrims worship there. Even the non-believer is impressed by the scene at dawn, when the sun first tints a sea of clouds, and projects slender shadows upon the countryside.

Immigrants Supplanted Natives

"When the civilization of the Sinhalese was at its height, more than 2,000 years ago, the capital, Anuradhapura, was a marvelous city extending over some 250 square miles. It was clustered with magnificent palaces, pagodas and monster relic-shrines of delicate design. This civilization was overthrown by Tamil mercenaries whom the Sinhalese imported from India; subsequently the island was held successively by the Portuguese, Dutch and now by the English.

"The 'walking fish' performs its terrestrial antics when ponds dry up in the hot season. Then it either burrows into the soft mud to wait for rain, or, by night, crawls out of the last shallow depressions and goes writhing off through dripping grass on the hunt for other pools. The natives then literally 'catch fish', sometimes gathering them up by the bushel.

"The island's area is about that of West Virginia and on it live more people than there are in Texas."

Russians and the Poles Disagree on War Spoils

Moscow.—According to information received by Rul from Vorsow, serious misunderstandings have taken place between the Polish and Russian delegations of the commission for re-evacuation, at Moscow. In keeping with the stipulations of the Treaty of Riga, this commission has been entrusted with drawing the lists of factories, machines, stocks of goods, etc., evacuated during the war from Poland to Russia and which should be returned to Poland.

The soviet delegation refuses to comply with the Polish demands, asserting that most of the evacuated articles perished. Another commission dealing with the re-evacuation of paintings and other museum pieces has reached a deadlock.

White Crow Captured by Youth Near Zoo

Sault Ste. Marie, Ont.—Reggie Bailey, ten-year-old son of Peter Bailey, during a ramble through the bush on the outskirts of the Zoo, captured a white crow. The bird, which is not yet fully grown, is perfectly white with the exception of the tips of the tail feathers, which are black.

FIRE IN STORE

Burning Excelsior in Furnace Nearly Destroyed Chillicothe Block.

A fire in the Mykrantz drug store, corner of Paint and Second streets, Chillicothe, broke out Saturday morning and for a time threatened the whole block. Worley Rodeheaver, an employe of the store, was burning excelsior in the furnace and had turned his back for a short time and a portion of the excelsior fell from the furnace and set fire to more of it on the floor. He tried to stamp out the flames but they got the better of him and soon spread to other parts of the basement. The fire was finally extinguished. The loss is estimated at between \$1200 to \$1500.

Woman's Rights

An Indiana court compelled a man to give back the false teeth he had taken away from his wife. Women's rights still include the privilege of biting, it seems.—Cleveland Plain Dealer.

SLUG THEIR WAY TO VICTORY

Yankees Take Fifth Game of the World's Series.

DUGAN AND BUSH THE STARS

Former Raps Out Four Hits, Including a Homer, "While 'Bullet Joe' Has the Giants at His Mercy—Meusel Brothers There With the Stick. Another Victory For the Yankees and the Series Is Over.

New York, Oct. 15.—The old snap and dash, the old chatter, was missing in the Giants' play yesterday. Joe Bush of the Yankees turned them back and back, only Irish Meusel solving his wizardry for the slim total of three hits of the Giants, and they remained buried under the Yanks' big lead.

The Giants were in a slump. The question is now, Will they snap out of it? They are a great team, a team of class, and have fought the hardest in the gloomiest outlook. The Giants need right now to have their spirits prodded, their spunk lashed to the fighting full. The Yankees are hitting, fielding and getting sweet pitching. They are full of confidence. They are now behaving as the Giants did in 1921 and 1922, when the latter won.

If the Yankees can win today on the Polo grounds the series is over. They will take the world's championship four games to two, the series being four in seven. If there is a seventh game it will be played at the Yankee field, which will accommodate more customers than the Polo grounds.

The Yankees scored three times in the first inning yesterday. Dugan singled, Ruth was passed and Bob Meusel tripled, scoring Dugan and Ruth. Meusel scored on Pipp's long fly. In the second Bush rapped out a single and Witt walked. Both scored with Dugan on the latter's home run clout to right center. Ruth was safe on Kelly's error and went to third on Meusel's safety. He scored when Frisch, who snared Pipp's hot grounder, threw wide to the plate. The Yanks made their final tally in the fourth. Dugan, Ruth and Meusel singled, the former scoring.

The Giants made their lone tally in the second, when Irish Meusel tripled. He reached home on a fielder's choice.

McGraw remarked to an inquisitive spectator who asked what he thought of the game, "Too much Dugan."

To Summon Governor Walton. Oklahoma City, Okla., Oct. 15.—A subpoena for Governor J. C. Walton to appear before the legislature's investigating committee is expected to be issued early this week. The legislature is expected to attempt to impeach the governor. Inasmuch as the committee is acting as a grand jury, the summons is significant. The committee, it is believed, wishes to get the governor's testimony explaining some of his acts, so that it may go in the record. Fred Dennis, former bank commissioner, is also expected to be a witness.

DR. LOUISE STANLEY

Chief of Home Economics Bureau, Department of Agriculture.

SOLONS RETURN

Favor Establishment of Trade Relations With Russia.

New York, Oct. 15.—The unofficial Hearst commission, arriving in New York today following a three months' tour of Russia, during which they traversed more than 8,000 miles after an exhaustive investigation, favors that immediate steps be taken looking toward the establishment of trade relations between the United States and the soviet republic.

The commission, consisting of Senators Ladd and King and Representatives Frear and Johnson, issued the following statement: "The commission is preparing a full report dealing with conditions in Russia. This involves the examination of accumulated data, many statements and documents, but the committee will be ready to report soon. Until then the members will refrain from expressing their views concerning Russia. In general we found conditions in Russia better than reported by many persons and favor that immediate steps be taken by the United States looking toward the re-establishment of trade relations between the two countries."

AMERICAN LEGION MEETS

Warfare on Ku Klux Klan One of Big Issues Before Convention.

San Francisco, Oct. 15.—American Legion convention opened here today. National Commander Alvin Owsley and a train load of Texas cow-punchers reached San Francisco Sunday, preceding the New York, Washington and Iowa delegations by a few hours. Approximately 150,000 visitors are guests of the Golden Gate metropolis. Problems of home and country, issues toward improvement of the nation's institutions and selection of competent national officials are receiving real attention from the rank and file of the former soldiers and former goats in attendance at the big meeting. Open warfare on the Ku Klux Klan is one of the real big issues to come before the convention.

THE WEATHER.

MOVES AGAINST REDS IN SAXONY

Stresemann Orders Breaking Up of Organized Bands.

AGED WORKERS INTIMIDATED

Youthful Radicals in Saxon Workers' Union in Open Revolt Against the More Cautious Conservative Elders. Communist Saxon Government Resent Order of Dictator Stresemann—Rioting at Mayence.

Berlin, Oct. 15.—Youth has declared a war of terrorism against age in Saxony, where the young, fiery radicals among the workers' unions in industrial centers are in open revolt against the more cautious conservative elders.

The young workers are intimidating the older men by their terroristic methods.

That is one of the new situations growing out of the cauldron of chaos in Germany. The more mature elements do not want to see Saxony go up in flames of revolution. Intimidated by armed organized bands of the youthful workers, they have appealed to the central government.

Acting under orders from the new dictatorial government in Berlin, which is seeking to create a new order of things in Germany, General Mueller, military commander in Saxony, continued his efforts to break up all "red army units" in that state. The communistic-socialistic Saxon state government takes the attitude that the Berlin government exceeds its authority in mixing in Saxon state affairs and that General Mueller can not legally disband the proletarian military units, and demands the immediate withdrawal of the decree ordering that disbandment and the giving up of all arms.

Chancellor Stresemann seems determined to enforce his new dictatorial authority, realizing undoubtedly that failing to do so in Saxony would mean the failure of the authority of the central government elsewhere.

The goal of the youth of Saxony is a soviet state like Russia. In this they are openly encouraged by the Saxon cabinet, with Premier Zeigner at its head. He is but 36, the youngest German premier. The revolutionaries assert that the elders are obstructing the progress of the nation.

In Berlin Chancellor Stresemann is busy today drafting dictatorial decrees against trusts and profiteering, and for financial reforms which will be promulgated in the next few days.

Police were forced to fire on rioters at Mayence when they attempted to storm the town hall. Many of the rioters were injured. Later on the rioting spread to other sections of the city and the police again attacked the mobs, firing several volleys. In the scrimmage seven were killed and 100 wounded.

FOREST FIRES SWEEP SETTLEMENTS

Lives Lost and Property Destroyed Near Los Angeles.

Los Angeles, Oct. 15.—Forest fires that for the past 24 hours cost at least two lives and property damage estimated as high as \$1,000,000, have been brought under control. Communities north of Los Angeles were the heaviest sufferers.

The verified dead: Clarence E. Edwards, Glendale, and Joseph McGahn, Bynamore canyon. The bodies were found in Sycamore canyon. Two others are reported missing at Montrose and are probably dead.

Pasadena, one of the larger cities threatened, was saved by 4,000 fire fighters, recruited from city fire departments, county and federal forestry employees and a legion of volunteers.

The area burned over is three miles wide and seven long, lying for the most part within the city limits of Glendale and portions of the beautiful mountain settlements of Verdugo woodlands, Verdugo park, Verdugo knolls, La Crescenta, La Canada and Montrose. Within these confines are many beautiful homes, some of them pretentious country estates of the wealthy. A score were destroyed.

Three firemen were injured by falling wires of the Southern California

SIDNEY WEBB

One of the Leaders of the Labor Party in England.

Edison company, which lost hundreds of poles. Recently laid out really, subdivisions, were costly prey, improvements being destroyed. Families who lost their homes camped in canyons and glens, their numbers augmented by those who fled through fear of the flames when their homes appeared doomed.

Pasadena and Flint Bridge, where millionaire country homes predominate, were saved by Sycamore canyon, the fire fighters stopping the conflagration when it reached this natural barrier.

DOINGS IN OHIO

Bank Ordered Closed.

Miamisburg, O., Oct. 15.—The Miamisburg Banking company was ordered closed by H. E. Scott, superintendent of state banks. Scott charges misappropriation of funds by President John J. Schwartz of Dayton, totaling more than \$50,000. According to officials of the bank the defalcation will total approximately \$108,000. Schwartz was arrested and, according to police, admitted speculation in securities with bank funds which he covered up with fictitious notes.

B. & L. Men to Meet.

Columbus, Oct. 15.—One thousand Ohio building and loan association men are expected to attend the two day convention of the league, beginning Wednesday. Among issues to be considered are ways and means of increasing assets in building and loan institutions to take care of the demand for home loans.

Ohio Masons to Meet.

Springfield, O., Oct. 15.—Twenty thousand Masons are expected Tuesday, Wednesday and Thursday, when the Grand lodge of Ohio meets in annual convention. Dedication of the Rickley Memorial hospital at the Masonic home will be a feature of the meeting.

Authority on History.

Cincinnati, Oct. 15.—Merrick Whitcomb, 60, professor of history at the University of Cincinnati, died at his summer home, Shawnee-on-the-Deleware. He had been on a leave of absence. He was recognized as one of the best authorities on history in the country.

Missing Boys Found.

Lima, O., Oct. 15.—Charles and James Fleming, 13 and 11 years old, respectively, who ran away from home, were located in Monroeville, Ind., and returned to their homes here. They had gone there to visit relatives and became homesick.

Boy Shoots Sister.

Franklin, O., Oct. 15.—Angered because he thought his sister Viola, 16, had hidden his cap while at play, James Fluhardy, 10, shot and wounded her probably fatally with a shotgun here.

Plunged Over Embankment.

Delaware, O., Oct. 15.—Harry Mason, 55, was instantly killed, and Jesse Gambel and Mrs. Margaret Blinn badly injured when Mason's automobile plunged over a 20-foot embankment near this city.

Sailor Drowned.

Sandusky, O., Oct. 15.—The crew of the steamer Cottonwood, which came into port to load coal, reported that Joseph Brennan, a sailor on the barge Chieftain, in tow of the Cottonwood, had fallen overboard and drowned.

Hospital Inmate Killed.

Canton, O., Oct. 15.—James Webb, 72, an inmate of the Massillon state hospital, was killed when he was struck by an automobile while walking in the road in front of the hospital grounds.

HIGH OFFICIALS BREAK DRY LAW

Charge Made By Pinchot, Governor of Pennsylvania.

CALLS UPON COOLIDGE TO ACT

No Sincere, Concerted Effort Made to Enforce the Eighteenth Amendment, Pinchot Says—Disobedience to Dry Act Flagrant at Washington, He Adds—Solicitor Beck Denounces the Amendment.

Washington, Oct. 15.—Gifford Pinchot, governor of Pennsylvania, called upon President Coolidge to take personal charge of dry law enforcement.

In an address delivered before a national citizenship conference here, Mr. Pinchot added that the effort should begin at home among high government officials, who he charged have become notorious for breaking the law.

Measured by the respect accorded it, he said, the dry law has proved a failure, and he cited these reasons: That no sincere effort has been made to enforce it; that the dry bureau is honeycombed with politics and inefficiency; that the federal government, alone responsible for the quantities of liquor released, fails to check the flow at its source, and that officials who should help either violate the law themselves or wink at violations.

Mrs. W. W. Willebrandt, assistant attorney general in charge of prohibition and tax laws, followed Governor Pinchot with what she declared would prove a more effective means of enforcing the dry laws. She said that better results could be obtained by charging offenders with violations of the internal revenue laws, which carry much heavier penalties than does the Volstead act. To do this, she said, all dry agents should be made internal revenue agents.

The air of the conference chamber was somewhat surcharged as an aftermath of accusations against United States Solicitor General James M. Beck by Rabbi Stephen S. Wise of New York. Dr. Wise said that Mr. Beck had no right to hold his position after saying the eighteenth amendment is a violation of personal liberties. The statement also created a stir in official circles here.

"Disregard for all law is more effectively spread by the failure of the enforcement service than in any other way," Governor Pinchot said in his address. "The bootleggers, the moonshiners and the brewers are the head and front of the army of criminals in America. All these facts taken together furnish abundant reason for treating the matter as of sufficient importance to enlist the active direction of the president himself."

"There is another reason why the president should take personal charge. Not only has the political hamstringing of the federal enforcement service had its seat in Washington, but it is notorious that disobedience to the eighteenth amendment has been flagrant in the capital. We can not expect other communities to respect and obey the law if the capital of the nation is a leader among lawbreakers."

"The eighteenth amendment has been betrayed. No sincere, intelligent and concerted nationwide effort ever has been made to enforce it. We all know the proof of that. It is found in the ease with which great quantities of liquor are being smuggled into this country; in the huge amount of whisky made from denatured alcohol; and in the continuing sale of high power beer from the breweries in truckload and carload lots."

ALL RECORDS SMASHED

Attendance and Receipts at the Fifth Game of World's Series.

New York, Oct. 15.—All records for attendance and receipts for a baseball game were broken at the fifth game of the world's series yesterday. Fans to the number of 62,817 paid \$201,459 to see it. The best previous "gate" was \$201,977, and the best attendance 62,430, both set in the third game of the series on Friday.

The total paid attendance for the five games is 267,258, and receipts \$924,563. The million dollar "gate" for the world's series will be reached today—or the day of the next game, if rain interferes. Each club's share is now \$208,547.75. The players' share for four games is \$362,783.04.

The total paid attendance for five games a year ago—the series went only five games—was 185,551 and receipts \$605,471.

OWES \$2,000,000,000

Italy to Be Next Nation to Fund its Debt to United States.

Washington, Oct. 15.—Italy, which owes the American government \$2,000,000,000 on war loans, will be the next great European nation to fund its indebtedness to the United States. Such is the prevailing opinion here among officials and diplomats most intimately in touch with the course of Italian policy under Premier Mussolini. Some move by the Italian government is confidently expected before the end of the year.

Corroboration of these views is seen in dispatches from New York revealing that large banking interests there are planning new Italian financing along unusual lines. President Coolidge last week endorsed the making of such loans to foreign governments where they could be arranged to advantage in aiding the work of reconstruction and economic rehabilitation. The president's endorsement was given by an authorized spokesman in reply to a question dealing specifically with the proposed Italian financing as connected with obligations owed the United States.

FACE STARVATION

Millions in Germany Doomed Unless Outside World Helps.

Berlin, Oct. 15.—More than 2,000,000 children in Germany face starvation this winter unless the outside world aids them with money and food.

That is the statement made at the headquarters of the German central relief committee by Hans Gramm, director of the children's feeding organization, whose principal task is saving the youth of the crumbling German nation. "The committee is entirely out of funds," said Gramm. "There is not a penny in its coffers."

Hitherto the committee has been financed chiefly from America by the Hoover relief administration, the Quakers and by Americans of German descent.

This winter the conditions are bound to become desperate. The catastrophic drop in the value of the mark has brought large sections of the people to the edge of starvation and has cut off possible native help to that extent.

MARKET REVIEW

Columbus, Oct. 15.—Market conditions during the week are reviewed by the Ohio division of markets as follows:

LIVE STOCK AND MEATS—Chicago hog prices ranged from 16c lower to 15c higher. Beef steers 25c to 6c lower; butcher cows steady to 25c off; feeder steers 10c lower to 10c higher; and veal calves 75c higher. Fat lambs, weak to 25c higher; feeding lambs 15c to 25c and 25c higher; feeding hogs 15c to 25c and 25c higher. Hogs, top \$8 25, bulk of sales \$7 70@8 25; medium and good beef steers, \$8 15@11 40; butcher cows and heifers, \$4 50@11; feeder steers, \$4 50@8 75; light and medium weight veal calves, \$8 50@12 75; fat lambs, \$11 50@13 75; feeding lambs, \$11 75@13 25; yearlings, \$8 75@11; fat ewes, \$3 75@6 75. In eastern wholesale fresh meat markets beef was firm to \$1, mutton firm to \$2 and pork firm to \$3 higher; lamb was \$2 net higher and veal weak to \$1 lower. Oct. 13 prices, good grade meats: Beef, \$16@19; veal, \$15@22; lamb, \$22@25; mutton, \$14@15; heavy pork loins, \$20@26; heavy loins, \$18 @20.

FRUITS AND VEGETABLES—Prices quoted Oct. 23 for New York round white potatoes \$2 05@2 10 in New York and Baltimore; northern round whites 50c lower in Chicago at \$1 @1 15 and at shipping points 90c@91. Onion markets dull; demand slow for yellow varieties, closing at \$3@3 50 for eastern stock, \$2 75@3 50 for midwestern stock. Cabbage market steady, New York domestic round type \$25@28 bulk per ton in New York and Baltimore; mostly \$14@15 f. o. b.; Danish type \$25@35 in city markets, mostly \$18 f. o. b. Eastern apples, demand slow; markets dull; eastern Baldwin \$3@3 25 per barrel in New York city, Jonathan \$3 50; midwestern Jonathan \$5 50@6 in Chicago.

GRAIN—Wheat prices higher earlier in the week, but eased off later. Closing prices in Chicago cash market: No. 2 red winter wheat, \$1 11; No. 2 winter wheat, \$1 12; No. 2 mixed corn, \$1 07; No. 2 yellow corn, \$1 09; No. 3 white oats, 44c. Average farm price No. 2 mixed corn in central Iowa 94c. Closing future prices: Chicago December wheat, \$1 08 3/4; Chicago December corn, 76c; Minneapolis December wheat, \$1 17 1/2; Kansas City December wheat, \$1 05 1/2; Winnipeg December wheat, 94 1/2c.

DAIRY PRODUCTS—Butter markets firm, with prices averaging 1c to 2c higher. Closing prices, 92 score: New York and Boston 47 1/2c, Philadelphia 48 1/2c, Chicago 47c. Cheese markets show tendency toward weakness. Wholesale prices Oct. 13 on fresh cheese at Wisconsin primary markets: Twins 25c, single daisies 23c, double daisies 25 1/2c, longhorns 25 1/2c, square prints 24 1/2c.

HAY—Timothy hay market firm because of light receipts. Prairie hay market lower at Chicago, receipts exceeding demand. Quoted Oct. 13: No. 1 timothy, New York \$20, Pittsburgh \$26, Memphis \$25, Cincinnati \$24, Chicago \$26 25, Minneapolis \$20, Kansas City \$17 50, No. 1 prairie, Chicago \$18, Minneapolis \$16 50, Kansas City \$14 50.

FEED—Markets remain quiet. Wheat feed prices steady to slightly easier. Interior demand continues very light and speculative traders who bought some time ago show anxiety to resell.

THREE-C HIGHWAY THING OF BEAUTY

Important Artery of Trade in
the Buckeye State.

WINDS FROM RIVER TO LAKE

Ohio's Most Picturesque Roadway
Largely Paved With Brick, Recognized as the Most Substantial and Economical Material, and Affording the Easiest and Most Comfortable Riding.

Unquestionably one of the most picturesque and beautiful highways in Ohio, and this a very flattering compliment, as well as one of great commercial value, is the "Three C's," leading, as its name implies, from Cincinnati to Cleveland, passing through Columbus on the way. The road takes its title from these cities, the largest from the standpoint of population and business activity in the state. The thoroughfare gains its fame for scenic attractiveness through the kindly and generous way in which nature dealt out its gorgeous favors when the framework of the world was made. Gifts of rich, level, fertile land, along river and winding stream; rolling and undulating prairie; high hills and almost boundless valleys glimpsing in between, were bestowed to mark the path of this truly famous road, which winds its way from the river to the lake.

What nature in its wisdom began,

The use of brick, therefore, has revolutionized the method of taking goods from place to place and made the "C.C.C." road an important factor in commercial life.

As a means of affording pleasure to thousands of tourists and sight seers annually, or to those who desire to take a ride of a day's length only, the highway holds out an invitation which ought not to be refused. It is needless to draw on imagination when actuality can not bring to mind or eye a more restful or scenically picturesque journey than can be had by going over the "Three C's," from Mt. Vernon to Loudonville, in Ashland county. The distance is but little more than 20 miles; it is all over a splendidly laid, well balanced brick pavement, where smoothness of motion and absence of jar are blended with every degree of safety. In places the topography is such as to make sharp curves in the roadway necessary, although they have been done away with as much possible. Engineering skill has met the emergency where these conditions prevail. The roadway has been widened on the turns and slightly raised on the outside. As a result the car glides around them with the same degree of comfort as is found in the straight stretches.

Every mile of this ride is through a country so beautiful that it is doubtful if the world could show anything on a more gorgeous scale. The attractiveness is not only in the grandeur but, equally as much, in the diversity of the landscape. You glide from one entrancing scene to another; from towering hills, in places reaching almost the impressiveness of mountains, to gentle, far-reaching fertile valleys, where fattening herds are grazing on the rich grass. The beauty of high land and low land are both brought before the traveler in abundance, away from the noise of the busy city and where one is in

seated themselves. The proprietor presented each with a piece of tobacco. Having filled their pipes, these were lighted and the remainder returned to their pouches. The latter were made of a whole mole skin, with a slit at the top for an opening. After smoking and talking for a while together, one at a time arose, went to the counter and taking up a yardstick, pointed to the first article he desired and asked the price. The questions were in this manner, "How many buckskins for a shirt pattern?" "How much cloth for leggings?" according to their skin currency. A muskrat skin was equal to a quarter of a dollar; a raccoon skin a third; a doe skin a half and a buck skin the dollar in full. The Indian, learning the price of an article, paid for it by picking out and handing the merchant the required number of skins. While the first Indian was trading the others looked on without interruption. When he was done another took his place, and so on in rotation until all had completed their transactions with the merchant. No one desired to trade before his turn; all preserved a proper decorum and there was no attempt to secure a reduction in price. If dissatisfied the Indian passed on to the next article. By this method they inspired confidence, and we are told never paid more than a thing was worth. They were also careful never to trade when intoxicated, retaining their full faculties until business was over. It is said that this method was peculiar to Mt. Vernon and that vicinity. As one glides along in contentment over the smooth brick paved highway and sees the towering and majestic hills, it is easy, in imagination, to picture the Indians as still living among them, sitting before the wigwam, with the camp fire blazing merrily away.

Vast Increase in Travel.

One thing which is particularly noticeable, and of which the prosperous farmers along the road tell you, is the vast increase in the amount of travel since the brick pavement was laid. Where formerly an occasional automobile, or horse and buggy, passed over the old, twisting, uncertain dirt road, impassable at times of the year, hundreds of automobiles now go by daily, oftentimes in long streams, one hard upon the heels of another. This has added a cheer and contentment to rural life, which could not be had in former days. It has also brought many social opportunities denied before.

If the time is given two side trips can profitably be added to the schedule. Outside of Mt. Vernon, not more than a mile and a half, on a road leading to Mansfield, is the home of Dan Emmett. It is a modest frame building, but has a historical value. Emmett, one evening in New York, before the Civil war and while a member of Bryant's minstrels, composed the words and music of the melody "Dixie." It made him rich in fame, although adding little to his purse. Many visit the home every year.

Another trip of interest is Gambier, the seat of Kenyon college, one of the oldest and most noted institutions of learning in the state. This is away from the direct route, a few miles, but easily reached. It is located on a high hill, giving a commanding view of the surrounding country. A more romantic or delightful place can not be imagined. The buildings are, most of them, old and of Gothic architecture. At one end the main walk, a half mile long, where towering trees intertwine their branches the entire way, stands Old Kenyon; at the other Bexley hall, the theological seminary. Bishop Chase of the Episcopal church founded the college in 1826 and it was named in honor of Lord Kenyon, one of the principal benefactors.

A stop should be made at the academy of the Seventh Day Adventists, but a short distance beyond Mt. Vernon, on the way to Loudonville. It is the only institution of its kind in the state and stands boldly facing the splendid brick paved roadway, both testimonials to modern advancement.

Should the ride be one beginning at Columbus there is much of interest before Mt. Vernon is reached. You pass through Worthington, going over an excellent brick road. This is a beautiful village, speaking of antiquity and early events of Ohio's history in a hundred ways. A little farther on is Westerville, the seat of Otterbein college and headquarters of the National Anti-Saloon league. It is now becoming an important manufacturing center and growing, as brick roads reach out and make ingress and egress easy. Then, in turn, the ride passes through Galena, Sunbury, Condit, Centerburg, Mt. Liberty and Bangs. Centerburg authorities have paved all roads but one within the corporation and used only brick as a material.

If this route has been followed you have had a wonderful day; have seen scenery as entrancing as any in the country and, to make the end more perfect, have ridden over a highway paved with brick, representing the highest type of road construction.

Food Gelatin From Seaweed.

Scientists have discovered they can secure large quantities of food gelatin from the seaweed that is so abundant along the coast of Lower California and a new industry may be developed based on that discovery. The seaweed supplies a great quantity of colorless and nearly tasteless gelatin that is of high quality, the particular seaweed found so valuable being the variety known as geridium, that grows in water from 10 to 20 fathoms deep and is gathered by divers working under the water.

Bulletin on Arsenicals Has Just Been Issued

Calcium Arsenate and Acid Lead Arsenate Compared.

(Prepared by the United States Department of Agriculture.)

A study of chemical, physical and insecticidal properties of arsenicals on the market was undertaken by the United States Department of Agriculture in order to gain a better understanding of them, to be able, if possible, to improve them, and to produce new arsenicals for insecticidal purposes. The results of this investigation are set forth in a new bulletin just issued by the United States Department of Agriculture as Department Bulletin 1147.

Paris green and lead arsenate, which have been standardized and found reliable for many years, have constituted the principal insecticides used against external chewing insects. However, during the past few years, the use of calcium arsenate has steadily increased, owing in part to the discovery that it is effective in combating the boll weevil. The manufacture of calcium arsenate although well beyond the experimental stage in most factories, probably will not be completely standardized for several years. Because of the importance and recent large-scale production of calcium arsenate, many of the results in this bulletin deal with comparisons of calcium arsenate and acid lead arsenate.

A copy of the bulletin may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

Practical Suggestions on Filling Silo in Fall

In cutting corn and filling the silo there are many things that can be done before the actual operation starts. Here are a few suggestions worked out by the farm department at Iowa State college:

See that the corn binder is in good working order.

Have plenty of good twine. It takes about six pounds to the acre.

Clean out the silo. If there is stagnant water in the pit, remove it.

See that silo doors are fitted properly. If any are out of shape, have them ready when the filling starts.

Keep hoops tightened, but do not turn them up so tight that the silo starts to dish in.

Get the cutter in shape. See that all bolts are tight and plenty of oil has been used.

Have a good supply of sharp knives. Improper cutting slows up the filling and makes poor silage.

If silo is partly filled with old silage, scrape off the top part until any spoiled silage is gone and then put the new silage on top. It will not hurt either the new or the old.

If corn is too dry, put water in it. If corn is green, water is not needed unless it is used to pack the silage.

Government Establishing Experimental Fur Farm

An experimental fur farm is being established in the northwestern part of New York state by the bureau of biological survey of the United States Department of Agriculture, in order that observations and studies may be made of the habits of fur-bearing animals and of the possibilities of growing them in captivity and producing fur of good quality. A similar farm which has been operated by the bureau at Keeseville, N. Y., will be discontinued as soon as the new one is ready. The new farm is located three and one-half miles from Saratoga Springs, N. Y., on the state highway to Corinth and is more easily accessible than the old, both by automobile and by bus line. The tract comprises 20 acres, of which approximately 15 are covered by an excellent growth of timber, and will furnish an ideal situation for the desired purpose.

"Government Whitewash" Best for Outside Work

Whitewash whiter than some, that lasts well on outside jobs, and that spreads so well that a pint covers nearly a square yard is being recommended for farm application by the New York state college at Ithaca under the name of "Government whitewash." The standard recipe given is: Slake one-half bushel of fresh lime with boiling water, covering the receptacle to keep in the steam. Strain the liquid through a fine sieve, and add seven pounds of fine salt, previously dissolved in warm water; three pounds of ground rice, boiled to a thin paste and stirred in; one pound of white glue, soaked first in cold water until swollen, then carefully melted over fire.

To this mixture add five gallons of hot water and let it stand covered for a few days before using.

Clean Packing Houses Will Prevent Diseases

Before starting the heavy pack of apples and pears, it is always desirable to give the packing house a good cleaning out. A grower should never keep decayed fruit of any kind in his packing house. Plums and peaches so left will often decay and brown rot will develop and the mummies will carry over the spores of brown rot, which will later attack the fruit brought into the packing house. Decayed apples and pears often carry over scab, which is a menace to the fruit.

The Sorbonne.

The Sorbonne is a famous college of the medieval University of Paris, founded in 1253 by Robert de Sorbon, chaplain and confessor of Louis IX, and devoted exclusively to the study of theology. As an institution of learning it enjoyed a European reputation from the fourteenth to the seventeenth century, but with the revival of learning its influence gradually declined. The Sorbonne was suppressed in 1790 and its property confiscated, but in 1808 it was reorganized by Napoleon I and became the seat of the Academie de France and subsequently (1816-21) of the faculties of science, theology and literature. In the chapel of the Sorbonne may be seen the tomb of Richelieu, designed by Lebrun, and executed by Girardon in 1694.

FRANK DENNIS FARM FOR SALE.

177½ acre tract, 6 room frame dwelling, good frame barn with metal roof, two good corn cribs and other outbuildings, well tiled and fenced with four good wells; located two miles west of Five Points on a good pike in Monroe township.

This is an ideal stock farm or it would make a nice country home. We are offering this at \$125 per acre for the next thirty days.

Terms to Suit Purchaser.

Possession given a short time after sale. Call or write,

Something of interest in want ads.

* * * * * AMUSEMENTS * * * * *

Bebe Daniels, who is known as "the speed girl of the movies," because of the speed roles she has played in pictures, has ample opportunity to gratify her craving for fast movement in her latest Paramount picture, "The Exciters," which Maurice Campbell directed and which comes to the Met theater next Monday. In the picture Miss Daniels as Ronnie Rand, chief of the "exciters," has the thrilling experience of riding an aquaplane, participating in a motorboat race, riding in an aeroplane and dashing madly about the Florida turnpikes in a speeding roadster.

"There are more speed stunts in this picture than in a half dozen of my former pictures," explained Miss Daniels. "When I got thru whizzing thru the air for scenes in the photoplay I was ready to sit still for the rest of my life. I don't think I will ever want to see a speed boat or an aeroplane again so long as I live."

Antonio Moreno, recently seen in support of Gloria Swanson in "My American Wife," is costarred with Miss Daniels in "The Exciters." He has the role of a young man of wealth who, to enjoy the thrills that accompany danger joins the United States Intelligence service and later identifies himself as a safe cracker, with a band of Crooks in order to obtain evidence of crime. Believing him to be a real burglar Miss Daniels as Ronnie, true to her reputation as an exciter, marries him. Many interesting developments follow, and the climax is novel and dramatic. The supporting company is made up of several well known screen artists.

What He Meant.
It is probably unnecessary to explain that the druggist who displayed a sign, "Say it with a brick," in his window, was referring to ice cream.—Lynn Item

KEEPS CHILDREN WELL AND STRONG

FOR children who are weak and thin Gude's Pepto-Mangan is the ideal tonic. It contains the iron they need for pure blood, bodily energy, and firm, solid flesh. At this season every child will benefit by taking it. At your druggist's, in liquid and tablet form.

Lunch on Grounds

oct11woct11&13d.

Remindful of other days. Horse and buggy climbing a hill between Mt. Vernon and Loudonville over the smooth brick pavement, but doing it with greater ease than in the time of dirt and mud.

man, in the development of his resources, has well completed and, out of the latter, the highway has gained its standing, as an important artery of trade and business progress.

Recognizing that brick forms the most substantial, the easiest and most comfortable riding and the most economical, because of the low cost of maintenance, the highway has largely been paved with this character of surface covering. In such places as have been coated with other material, the difference in the comfort of transportation is so apparent that the long stretches of smooth and well laid brick are welcomed as adding to the pleasure of a trip, giving greater facility for enjoying the wealth of scenic beauty to be found on every side.

It is hardly possible to estimate the worth of the road from the standpoint of commercial value. This can best be gained by a ride over its long miles. Heavily laden trucks, bearing

close communion with nature.

The ride likewise takes you through a country filled with historical interest. Mt. Vernon, the seat of Knox county, is one of the earliest settlements in Ohio. It was laid out in 1805 and named by the proprietors of the soil, Joseph Walker, Thomas B. Paterson and Benjamin Butler. A peculiar thing which attracted these founders of the city was two wells, only a few rods apart, on the south bank of the Vernon river. They were built of neatly trimmed stone, laid in regular masonry and had the appearance of being overgrown with moss. The origin of the wells has always remained a mystery, but it is supposed they were built by Indians, who had lived in the vicinity for many years before. Shortly after the first settlement all traces of the wells were obliterated and, it is supposed, this was done by the Indians, in order that they might prove of no service

What the "Three C's" brick paved highway has done to increase and modernize traffic. Scene just beyond Mt. Vernon, on the way to Loudonville, but common to all parts of the road.

goods representing thousands of dollars, are passed at frequent intervals. The majority of this was formerly shipped by freight over railways. Realizing, however, that finely constructed brick roads offered greater inducements, since there need be no conformity to pre-arranged schedules, that the cost was less and the brick pavement minimized the danger of breakage in transportation, shippers more and more began to take advantage of the public highway. At present it has reached tremendous proportions and is steadily growing.

to the white man, who were regarded as interlopers.

In the early days of Mt. Vernon the Indians, who lived in great numbers among the hills between that place and Loudonville, and through which the ride of today over the easily traversed brick pavement will carry you, came to Mt. Vernon to trade. They brought large quantities of furs and cranberries to exchange for goods. Their methods were unique and not lacking a certain element of shrewdness. Going to the only store they walked in deliberately and

GOOD ADVICE.
All that Circleville needs to start an industrial revival is for its citizens to forget self and join hands in a whole hearted movement in bolstering up industry.

If each person will forget petty personal jealousy, stop knocking and begin to boost in an effective manner the city can easily double its population in five years at the same time doubling the value of every foot of property in the city. Boost, don't knock.

James J. Hinde.

Louisiana Purchase.
The United States government paid France nearly \$15,000,000 for Louisiana, although it was at the time still in the possession of Spain. Spain transferred Louisiana to France on the specific condition that she would never transfer it to any other government. England notified the United States that she would never consent to French occupation of any part of North America. Napoleon sold Louisiana to the United States to prevent it from falling into the hands of England. Technically speaking, France did not have a transferable title, and the territory was still occupied by Spain. But the latter country was in no position to object and so the bargain was made.

Partially Identified.
Sloan—"Did you ever meet a fellow down there with one leg named Sanders?" Doan (pondering)—"What was the name of his other leg?"

**Heavily Embroidered
Frock for Young Miss**

Navy blue, heavily embroidered in gold and red, makes this most attractive dress for the young woman for fall wear.

**How to Make Mirrors
Create Cheerfulness**

Adroit mirror usage in the small, rather shadowed hall creates an atmosphere of cheerfulness. Place within its range a bowl of pretty flowers, roses, or simple garden blooms and note the brightening effect that the reflection of their colors creates. From another angle the gay chintz hangings at one of the living room windows, glimpsed through the open door, are repeated in the mirror surface, supplying a vivid touch to the somber wall on which the mirror hangs. The value of a mirror in such a spot cannot be overestimated, so if your hall is a bit shadowy, by all means employ a mirror to give the needed brightening touch.

In rooms facing the north, in which the sun refuses to shine during the long winter months, use a mirror in conjunction with touches of orange or red. No colors bring such a warmth of tone as orange or red, yet they are infrequently employed, because they are so little understood. Let us suppose our choice for effect is orange, our bedroom and our wall covering putty tones. Hang the mirror above the black chest of drawers which shows as decoration narrow bands of orange. Choose an orange runner for the bureau top, softened at the end with blendings of old blue. Repeat these tints in the curtain hangings, and on the floor lay a two-tone blue rug. Introduce a predominance of orange in the chair cushions, and hang within range of the mirror a wall pocket of blue luster filled with a tangle of orange bitter-sweet vine. Border the blue bedspreads in orange, and then behold the result! The vivid orange will be repeated from every angle in the mirror's reflecting surface, bringing the glint of sunlight to add a welcome touch, but its vividness will not be overemphasized, thanks to the toning influence of the ebony and the softening shadows of blue.—Arts and Decoration.

**Crocheting, National
Time-Killing Sport**

A young and fairly intelligent married woman, on a yacht cruise, was observed by a male passenger to be busy with a crochet needle and a big spool of heavy thread making little wheels, which were put together to make big wheels, which in turn were to be combined some day in the grand sum total of a marvelous white bedspread, made of millions of stitches.

She sat, hour after hour, day after day, fingers flitting and eyes fixed on the work in her lap, oblivious to the beauty of the sky, water and forest. She had sailed presumably for a vacation outdoors. "I figured on making two of these a day," she explained proudly, "but I have done better than that. I may get the spread done in less than two years. I know a woman who was offered \$1,000 for one."

She didn't need the \$1,000, either. Her husband would have gladly given her that much to stop her eternal crocheting and take an interest in life.

Not all women seem to be profiting by the new leisure they have won.—Norfolk News.

**Sleeves and Necks and
Effect of Cooler Days**

Only a hint of cold weather was needed to send arms under cover so far as women are concerned. Sleeves have appeared as if by magic, and even when short sleeves or sleeveless frocks were worn, arms that have been bare all summer are covered by gloves. Some compromised by the addition of little double puffs, two puffs to each arm, attached at the shoulders. These are of plaited georgette and come midway to the elbow. Sleeves on afternoon costumes in most instances are long and tight, coming well over the hand, as the Paris mode prescribes. Neck lines, however, continue to follow the canoe type with open gunwales—that is, the hem stands well away from the neck and shoulders. Sometimes a standing collar is a feature.

The Fast Age.
"The world never moved so fast before," mused Mr. Simmons. "We have winter ice on the Fourth of July, spring vegetables on Christmas; we buy our straw hats in February and our felt hats in August; we get our Sunday paper on Saturday night, and our magazines a month ahead of time. If we telephone a man in San Francisco from New York, he hears our voice about four hours before we speak; and if some one in Japan sends us a cablegram tomorrow, we get it today."

APPLES! APPLES!

Our large crop of well sprayed Winter Apples are now ready for market. We make a specialty of Orchard sales. Pay a visit to our orchards and select your winter's supply of apples. Two miles east of East Ringgold. Grandview Fruit Farm.

Unwritten Book of Dreams.

Ossian was the Homer of my earliest years; to him I owe somewhat of my melancholy as a painter. This is the sorrow of the sea. I very rarely tried to imitate him, but involuntarily I assimilated the vagueness, the dreaminess, the self-annihilation in reverie, the eye that contemplates confused apparitions far away. Ossian was for me an ocean after tempest, on which something was floating under the light of the moon, where figures of young girls seemed lifting their white arms and spreading out their wet hair upon the foam of the waves, where I heard plaintive voices interwoven with the moaning of the waters upon the reef. Ossian is the unwritten book of dreams and the pages of it are covered with enigmatical characters on which my eye rested as I wrote and rewrote my own poems, as a dreamer may compose landscapes out of the motions of the clouds.—Lamartine.

The Wonderful Horse.

Oh, horse, you are a wonderful thing; no buttons to push, no horn to honk; you start yourself, no clutch to slip; no spark to miss, no gears to strip; no license-buying every year, with plates to screw on front and rear; no gas bills climbing up each day, stealing the joy of life away; no speed cops chugging in your rear, yelling summons in your ear. Your inner tubes are all O. K. and, thank the Lord, they stay that way; your spark plugs never miss and fuss; your motor never makes us cuss. Your frame is good for many a mile; your body never changes style. Your wants are few and easy met; you've something on the auto yet.—H. R. Elliott, in the American Forestry Magazine.

Left-Handed.

Do left-handed people differ from other people? An eminent physiologist says left-handedness means an abnormal sex balance, that the right side is the predominantly sexual one, and that, consequently, left-handedness means in a man more or less effeminacy, and in a woman more or less masculinity. Watch a man clasp his hands. A left-handed man will have his left thumb on top, and will be in some degree or other effeminate. Again, watch a woman manipulate her hairpins. If she uses her left hand, her character will show the relative masculinity. At least, so says the Austrian scientist.

What and Where is Atlantis?

The name is that of an imaginary island of vast extent lying in the Atlantic ocean off the Pillars of Hercules. It is said that an Egyptian priest first told Solon of its existence. It is mentioned for the first time by Plato in the Timaeus and Critias. He gives a glowing account of the land, and enriches it with a fabulous history. About 9,000 years before his time the island is said to have been submerged by an earthquake, sent as a punishment for the wickedness of the people. Some authorities have identified the Canary Islands with the lost Atlantis, while others hold the story to be a fable.

Queer Dusun Customs.

Many things are tabooed among the Dusun tribe on the island of Borneo. A man may not mention his own name, that of his father, mother, mother-in-law, or father-in-law. It is forbidden, or at least it is unwise, to point at the rainbow, because the finger which is pointed will rot away. There is a general belief in the existence of tailed men, who are said to be cannibals. Giants called Tempulalongi figure largely in the folklore of the people. These seem to be supernatural beings, who have a liking for visiting burial places and calling on the dead to rise from their graves.

A "Piece" of Sea.

I want awfully to tell you, today, about a little "piece" of green sea, and gulls, and clouded sky with the usual golden mountain-breaks to the southward. It was wonderful, the sea near at hand was living emerald; the white breasts and wings of the gulls as they circled above—high above even—were dyed bright green by the reflection. And if you could only have seen, or if any right word would only come to my pen to tell you, how wonderfully these illuminated birds floated hither and thither under the gray-purple of the sky!—R. L. S. in "A Letter."

Luck at Cards.

Many card players are particular about the cut of the cards. They must be divided and put back with the most meticulous care. A slovenly cut brings good luck to the dealer and bad luck to the cutter. Some imagine that special tables or positions at the tables are lucky to them, and refuse to play unless they can get the places they desire. Others conceive that certain members are unlucky to them, and nothing will induce them to play with them. To drop a card on the floor when playing is generally regarded as a bad omen.

Swallow's Nests as Medicine.

The Chinese highly prize the swallow's nest for its supposed medicinal value. The doctors of China regard it as a tonic capable of restoring a patient's lost vigor, and it is also said to be efficacious in curing lung diseases and smallpox. As a table delicacy the article is also highly considered, and a sumptuous Chinese dinner is not complete without a dish of this, to the celestial taste, palatable food. Swallow's nests are rich in albuminous matter. They are produced chiefly in the vicinity of the Malay Archipelago, such as Borneo, Sumatra, Java and the Philippines.

GOOD PROGRAM

At Mt. Pleasant W. C. T. U.—November Meeting With Miss Jones.

The Mt. Pleasant W. C. T. U. met at the home of Mr. and Mrs. Luther Kern Wednesday evening, October 10. The membership was well represented and ten visitors present. The program was:

Song—Count Your Blessings
Scripture Reading
..... Mrs. Harriet Helwage
Lord's Prayer in unison
Roll Call

Team Report Mrs. Minnie Kegg
Reading—Safety and Happiness Depend Upon Obedience to Law....
..... Mrs. Fannie Sampson

Piano Duet Mrs. Allemand and Miss Ruth Gerhardt
Reading—Reasons Why the Prohibition Law is not Adequately Enforced Everywhere and Suggested Remedies Miss Bertha Jones
Piano Solo
..... Mrs. Luther Kern
Reading Mrs. Minnie Kegg
W. C. T. U. Benediction

All remained for the social hour during which the hostess served sandwiches, chicken salad, ice cream angel food cake and coffee.

The November meeting will be held at the home of Miss Bertha Jones.

Fearful and Wonderful.

Helen's mother had told her that her legs and arms were like the limbs of the tree and her body like the trunk. One night Helen bumped her knee and running into the other room cried: "Oh, mamma, I hurt the limb of my suitcase."

Subscribe to the Hinde Paper Box company and let us help get the Fibre container business started here which will grow very rapidly bringing other lines of business with it.

SHERMAN GREEN DEAD.

Sherman P. Green, 50 of 365 Wilson avenue, Columbus, died Saturday. He is survived by two sons, Clyde C. and Carl W. Green and three daughters; Mrs. Charles Jester, and Misses Anna R. and Coral M. Green; two brothers and four sisters.

Funeral services Tuesday forenoon at 10 o'clock at the home. Burial in Amanda cemetery.

TO GET ACCUSED.

Deputy Sheriff Howard Irwin went to Bellaire to bring back Elmer Darst indicted on the charge of burglary and larceny. Darst was out on bond, but failed to come back when his case was called in common pleas court.

Small Savings Important.

Small savings are like stones in a bridge; they build a firm support to carry one over the flood of an emergency.

DANCING

MEMORIAL HALL

FRIDAY NIGHT, OCTOBER 19
EVERYBODY WELCOME

15octd5.

* SOCIAL CALENDAR *

Mrs. Charles Mason will entertain Tuesday evening in honor of Miss Helen Leist, a bride-elect.

Misses Virginia Shulze, Louise Renick, Mary Marfield and Bess Frey, of this city, and Miss Eleanor Jones, of Washington C. H. motored to Washington, Pennsylvania, Saturday to witness the Washington and Jefferson college eleven play the Brown university team. The former won by the score of 12 to 7. The young ladies were guests of Rufus Short, George McCrea and Donald Morris, students at Washington and Jefferson college.

* BORN *

To Mr. and Mrs. Lawrence Goodman
Circleville township, Saturday, October 6, 1923, a daughter.

The "Seven Senses."

According to Ecclesiasticus, 17:5, man is endowed with the senses of seeing, hearing, tasting, feeling, smelling, understanding and speech. The last two are not, of course, "senses" in the scientific meaning of the term.

DANCE

C. A. C. gym Pumpkin Show October 17th to 20th. Every night at 8 o'clock and Saturday afternoon at 2 o'clock. Music by the Society entertainers. 11octw1.

EXAMINATION
MUNICIPAL CIVIL SERVICE.

The Municipal Civil Service Commission will hold an examination on WEDNESDAY, OCTOBER 31, 1923, at 7 o'clock P. M. in the council chamber in the City of Circleville, Ohio, for the positions of:
Chief of Police.
Patrolman.
Chief of Fire Department.
Fireman.
Blank applications may be secured at the office of the secretary and must be filed with him not later than 7 o'clock P. M., Saturday, October 27, 1923.
Circleville Municipal Civil Service Commission.
GEO. P. FORESMAN, Secretary. 15octd15.

CHEAPER THAN ELSEWHERE

AUTO ACCIDENT

Mrs. Samuel Denman Seriously Injured and Husband Badly Bruised.

Mr. and Mrs. Samuel Denman, who live at 1510 Aberdeen avenue, Linden, a suburb of Columbus, were seriously injured when the machine in which they were riding was struck by a southbound Columbus, Delaware & Marion traction car two miles north of Worthington Sunday.

Mrs. Denman's left leg was broken in two places by the crash; her right leg was lacerated and she suffered internal injuries. She was removed to the White Cross hospital.

According to Mr. Denman, they had driven to the home of a friend two miles north of Worthington. Tracks of the Columbus, Delaware and Marion line run directly before the entrance to the yard of the friend's home. Mr. Denman said, and in driving into or out of the yard, the tracks must be crossed.

Finding the friend not at home, Mr. Denman said he started to drive out of the yard and failed to notice the approach of the interurban.

The auto was nearly across the track when struck by the car.

Mr. and Mrs. Denman formerly lived in this city. He, at one time, was in charge of the Scioto Valley traction station. He is a brother of Harry Denman, employed by the Water Works company.

A LESSON LEARNED.

"Prosperity," said Lincoln, "is the fruit of labor; property is desirable; is a positive good in the world. That some should be rich shows that others may become rich, and hence is just encouragement to industry and enterprise. Let not him who is homeless pull down the house of another, but let him work diligently and build one for himself, thus by example assuming that his own shall be safe from violence when built."

Prophetic voice! Lincoln knew what it means to labor against almost insuperable odds; he was a child of the soil, a child of the people to whom toil was an inheritance; but he did not, through his glorious constructive life, look with envy upon the material success of his fellows. He did not advocate the tearing down the house of another, but proceeded to erect his own, to carve out a career that forever will stand as a marvel before the gaze of the world.

Lincoln was wise with a calm wisdom, the wisdom of love and charity of realization and consideration, of experience and reflection, of observation and practice.

America has learned well this great lesson submitted by the martyred president. The nation opposes it confidently to the sycophants of those who would offer in exchange a wisdom presumptively wiser than that of the man who declaimed "with malice toward none, with charity for all."

And this elimination of malice, this unrestricted outpouring of charity, was, in Lincoln's view, to be applied to the economic as well as to the political and spiritual problems of the nation.—Cincinnati Enquirer.

Bell That Worked Miracles.

Many tales of the supernatural are told concerning evil spirits and the efficacy of bells in warding them off; likewise regarding the power of consecrated bells for bringing blessings. In an old chapel at Killin in Perthshire, Scotland, was a bell called that of St. Fillan, which had the reputation of curing lunacy. After the sufferer had spent a night in the chapel he was in the morning placed with great solemnity under the bell, and in many cases recorded in the old chronicles the faith was rewarded.

One hundred and sixty-nine people will be given steady employment at the Hinde Paper Box company's new plant. Subscribe now and let us help them get it started.

NOTICE TO CREDITORS TO CONSIDER COMPOSITION. In the District of the United States. For the Southern District of Ohio. In the Matter of The Home Trade Company, Bankrupt. IN BANKRUPTCY.

Notice to creditors to consider composition offered by Bankrupt: Take notice, that a meeting of the creditors of the above named bankruptcy will be held at the office of the undersigned, rooms 5 and 6 Masonic Temple, Circleville, Ohio, on Friday, the 26th day of October, 1923, at 10 o'clock in the morning for the purpose of considering a proposed composition made by said bankrupt to creditors in satisfaction of the unsecured debts, (not entitled to priority) owed by said bankrupt to each of said creditors which proposed composition is to pay 25 per cent.

H. B. WEAVER Referee in Bankruptcy. October 15, 1923. 15oct13.

PLAN NEW SPAN ACROSS NIAGARA

Latest Structure Will Be for Use of Railroads Only.

RECALLS BUCKET AND CABLE

Another new steel arch bridge is to be built across the Niagara gorge to connect Canada with the United States. It will be the third bridge of that type erected at Niagara, but the fourteenth bridge to span the river at that point. It will be for railway purposes only, and more massive in construction than either of the two steel arches now standing.

Ground has been broken. On both sides of the river men are at work stripping away the river bank and the face of the cliffs preliminary to the building of abutments on which the legs of the arch will rest. The abutments will be four in number, two on each side of the river, built of concrete and faced with rock. Into these will be sunk the rods and plates to be used as anchorages, and great holes also will be sunk in the sides of the cliff for other anchorages.

Much excavation is necessary to clear the site, and on the New York bank of the river a great steam shovel has been lowered over the cliff to bite away the rock and dirt, undisturbed for centuries, ever since the Horseshoe fall went by as it plowed through the gorge from the high escarpment at Lewiston to the point where it now affords a scenic spectacle of falling waters unrivaled in the world.

Each bite of this steam shovel is dropped into a chute, which spills the dirt and rock into the river right at the beginning of the whirlpool rapids and far outside the tracks of the Niagara Gorge railroad, over which a protecting shed has been erected of huge timbers so that no harm may come to the thousands who patronize the scenic route. The dumping of this rock on both sides of the river will have the effect of narrowing the channel at a point where it is none too wide to carry away all the water that plunges over the falls, as well as that diverted for power purposes and returned to the stream in the gorge near the falls. Out in front of the spot where the bridge work is going on the river is only 85 feet deep and rushes by at 23 miles an hour as it swings the flood of the torrent into the whirlpool rapids.

This new bridge is to have a span of 640 feet in its main arch, compared with 560 feet of the present railway arch and 840 feet of the arch two miles up the river close by the falls. At each end of the main arch there will be a truss span of 100 feet, extending to the high bank. On the New York side there will be an approach span of 101 feet and on the Canadian end another of 51 feet.

To Carry Two Tracks.

About 10,000 tons of steel will be needed and the bridge will be designed to carry a load of 7,000 to 8,000 pounds per running foot on each of the two railroad tracks. The bottom of the arch will rise 207 feet above the normal water level of the river below. The site selected for the bridge is between the lower steel railway arch used by the trains of the Canadian National railway and the cantilever bridge over which the trains of the Michigan Central cross the river. It is being erected to supplant the cantilever bridge, which will be torn down when the new arch is ready. This cantilever bridge is the only one of the type erected at Niagara. It was originally built in 1883 and has been strengthened since then, but no longer meets the need of the trains of today. All the foundation work is to be completed this year in order that the erection of steel on the bridge proper may go forward next year.

When the railway steel arch was built in 1897 it was erected beneath the old railway suspension bridge at that point. Day by day the work went on and the arch grew in size without any interruption to traffic on either deck of the old bridge, the load having been shifted from the old to the new structure. The same methods were followed with the upper steel arch near the falls, which took the place of a steel suspension bridge in 1897-98.

This new arch will be the first of its kind erected at Niagara on a new site without the help, if much help there was, from an overhanging bridge of the suspension type.

There is a wealth of story in the Niagara bridges. In the latter part of the 40's the trend of empire was westward. Stages carried the pioneers to the Niagara border, where the great gorge and rushing river were obstacles to progress. It was necessary to detour miles up or down stream to cross by boat. The necessity of a bridge was apparent. Engineers enlisted the aid of small boys to make connection between the cliffs by kite strings. Homan Walsh dropped his kite on the New York bank after flying it high in Canada. Young Walsh lived on the New York side and to win it was necessary for him to go across the river in the ferryboat near the falls and walk two miles down stream to the proposed bridge site. On the first attempt he succeeded in dropping the kite, but the string hung so low that it was caught by the ice floe in the river and broken, and so heavy was the flow of ice that for eight days Walsh was unable to cross the river.

Soon after that he tried the feat again and won success with his kite, the Union. The slender kite string served to draw a heavier line across the gorge, which in turn was followed by heavier ropes and cables. On the cableway so formed an iron basket, now in possession of the Buffalo Historical society, was operated, and passengers carried at \$1.25 a head. This cableway helped build two bridges or platforms, one on each side of the cableway, each three feet wide, over which crossings were permitted by foot at 25 cents for each person. While the second aerial bridge or platform was being built a windstorm swept down the gorge and wrecked it. Six men were working there at the time. Two reached shore, but the four others swung between the river and sky with only two strands of No. 10 wire to support them. It was then that William Ellis went out in the iron basket with a ladder, which he placed as a bridge between the basket and the platform on which the men were, and over which they crossed to the basket and safety when they were drawn ashore.

Early Building Efforts.

The two platforms or bridges were used to assist in the building of another bridge, which gave way to the old wooden railway suspension bridge, completed in 1855. It was over this bridge that the locomotive London crossed the river on March 8, 1855. The way people of those days looked upon the completion of the bridge and the iron horse traffic made possible between the two countries was described by one man who witnessed the crossings on Sunday, March 18, 1855, and wrote:

"Awful violation of the Sabbath by long trains of freight cars with multitudes of men on top of them crossing and recrossing the bridge and shifting the freight will not soon be forgotten by those who revere the holy day. The curse of God will rest on this bridge is my firm belief."

It was on March 19, 1856, that the first passenger train, drawn by the engine David Upton, with Upton himself as a passenger, crossed the bridge.

The lower deck of this bridge was used for foot and carriage travel and at each end of the bridge a sign reading as follows was posted:

"A fine of \$50 to \$100 will be imposed for marching over this bridge in rank and file, or to music, or by keeping regular step. Bodies of men or troops must be ordered and kept out of step when passing over this bridge. No musical band will be allowed to play while crossing except when seated in carriages or wagons. "Five dollars fine for every horse driven over this bridge at a faster rate than a walk. "Five dollars fine for allowing teams or horses to stop on the bridge longer than absolutely necessary. "The above fines will be rigorously exacted in all cases when the rules have been infringed."

Traffic across the bridge grew heavier year by year and in 1880 the old wooden truss gave way to a steel truss, and six years later the stone towers were replaced by others of steel. The present steel arch took the place of the suspension bridge in 1897.

Bridge building two miles up the river in front of the falls did not begin until 1868, and the first suspension bridge was opened on January 2, 1869. It was a narrow bridge, the longest over the gorge, of wood, and picturesque in its slenderness. In 1888 it was replaced by a wider bridge of steel, but before this bridge was a year old it was destroyed by a windstorm on the night of January 9, 1890. In May of the same year a duplicate of the ruined bridge was opened to travel and gave service until 1897-98, when it was replaced by the present upper steel arch over which trolley cars cross to Canada and return.

BEARS MAKE RAIDS ON FARMS.

Residents in Pennsylvania Face Serious Problem.

Black bears are becoming so numerous along the Highland road a few miles from Kane, Pa., as to prove a serious problem to the farmers. The farms which line these roads are all near large tracts of forest lands, where wild game abounds and under the protection of the state laws the animals are becoming so tame in many instances that the farmers declare they are nuisances.

While members of the family of Juan L. Gaston, living on a farm near the hamlet of Highland Corners, were sitting on the porch, during the early evening recently, they heard a commotion in the barnyard a few hundred feet away. Horses were neighing, cattle lowing and hens cackling.

Investigation showed a large black bear making its escape across the fields in the woods after having knocked over a beehive and scooped out the honey. The family of C. W. Fairweather, living about a mile from the Gaston place, on a number of occasions have chased bears from their chicken house.

Find Razor Blades in Loaf of Bread.

Accused of selling bread in which razor blades were found, Peter Klerer, a New York city baker, was haled into court at the request of Mrs. Mary McKillen. The judge ruled that razor blades were not mentioned in the sanitation code and released the baker.

Shoots Gun From 'Cops' Hand.

Confronted by a pistol in the hand of a policeman who caught him robbing a store at New York city, a man shot the gun out of the officer's hand and escaped. The officer was not even scratched by the shot.

PERSONALS

Milt Morris was a business visitor in Columbus today.

Joe Wolf went to Lancaster today to ship his horses home.

D. Winter Newhouse was a business visitor in Columbus today.

John Pemberton of New Holland, was a business visitor in Columbus today.

Misses Hazel Greeno and Ruhama Myers spent Sunday in Columbus with friends.

Harry Yates accompanied by his guest, William Murphy, were business visitors in Columbus today.

Samuel Fullen visited his mother, Mrs. Frank Fullen, at St. Anthony's hospital in Columbus today.

Edward Hass, of Cleveland, a student at the O. S. U. was the guest of his roommate, Alonzo Marion, over Sunday.

Miss Genevieve Sensenbrenner, a student at the Columbus Business College, spent the weekend with her parents, Mr. and Mrs. Edward Sensenbrenner.

Miss Lillian Van Heyde, of Cleveland, visited her aunt, Mrs. Ella Crites at Mt. Carmel hospital, Columbus, Sunday. Mrs. Crites is undergoing treatment for her eyes.

Miss Mildred Wertman and brother Kenneth Wertman, students at the O. S. U., were the weekend guests of their parents, Mr. and Mrs. George Wertman, in Washington township.

B. F. Yates went to Marion today to start the races for the Marion Trotting association. These races were to have been run in August, but owing to the funeral of President Harding were put off until this week.

Mr. and Mrs. J. S. Work, of Denver, Colorado, who have been visiting Mrs. S. W. Miller and other relatives the past summer, have started for the south touring thru Tennessee and Alabama and on to Florida.

Germany Not Poor.

Princeton, N. J., Oct. 15.—Germany is far from being in a state of poverty and is well able to pay reparations. President John Grier Hibben of Princeton university, who has just returned to America after an extended tour of Europe, said. He explained: "I did not find any evidence of poverty or unusual distress in Germany. The stream of population passed before me much as it appeared in the days of 1912, the time of my last visit to Berlin."

Kidnaped by Chinese Bandits.

Shanghai, Oct. 15.—Chinese bandits have captured J. Stamm, Standard Oil representative, near Luchow, and are holding him for \$2,000 ransom. The bandits threaten to kill Mr. Stamm if the matter is reported to the authorities. Four junks loaded with oil were taken by the bandits at the time Mr. Stamm was kidnaped. Rev. W. A. Hick of the China Inland mission, was shot through the neck and seriously wounded during the fighting for the possession of Chung King.

Players to Get \$360,000.

New York, Oct. 15.—Players of the New York American league and National league clubs, now engaged in the world's series contest, will split \$362,783.04, the winners getting 60 per cent of the pool. Saturday's game was the last in which the players figured in the gate receipts.

President Obregon's Condition.

Mexico City, Oct. 15.—Reports from President Obregon's physician at Lake Chapala, state of Jalisco, where the chief executive was taken to recover from a recent illness, indicate that while his throat trouble has been partly conquered, his main affliction is heart trouble. Obregon's condition, while not reported as serious, has caused considerable apprehension in political circles, while recent bulletins from Lake Chapala are not optimistic.

NEWS BRIEFS

Appointment of J. D. Taylor as acting prohibition director of South Dakota to succeed Director William O. Knight, resigned, was announced at Washington.

A fort of the Warsaw (Poland) citadel, in which explosives were stored, blew up, causing great damage in the city. Twenty-eight persons are known to have been killed and 100 injured.

French aviator Maneyrol, competing in the motor glider contests at Paris, was killed when the wings of his plane gave way.

Three children were burned to death when S. C. Garden's store at Phenix City, Ala., was destroyed by fire.

Fire destroyed a block in the business section of Nogales, Sonora, on the Mexican border.

One hundred and eighty local people have subscribed to the Hinde Paper Box company \$25,200. Subscribe now and help get this fine industry started.

STARS ARE PUT TO MANY USES IN EVERYDAY LIFE

Smithsonian Institution Report Describes Recent Achievements of Scientists.

Among the recent developments and achievements in the scientific world, described by the Smithsonian institution in the latest of its reports, just out, are the many uses to which the stars are put in everyday life.

Dr. W. W. Campbell, of Lick observatory, writing on "Daily influences of astronomy," gives many of the interesting facts of the astronomical knowledge and tells of the application of certain of them.

For example, observations of the stars are supplying all nations with accurate time; accurate maps of continents and islands depend on astronomical determinations of their latitudes and longitudes; in America, boundary lines between nations are fixed by observations of the stars; the sailing of ships over long courses determined from the work of astronomers.

The age of the earth is discussed in an article by Lord Rayleigh and several other scientists, each considering the problem from the point of view of a different science. From a study of the rate of decomposition of the radioelements, Lord Rayleigh deduces a length of time of around 2,000,000,000 or 3,000,000,000 years in that the earth's crust has been suitable for the habitation of living beings.

Among the various anthropological papers in this Smithsonian report is a discussion by Dr. Ales Hrdlicka, of the United States National museum of the color of eyes, hair and skin among old American families in which there has been no admixture of foreign blood for three generations or more.

The observations were made on nearly 2,000 individuals, male and female, from north and south and of varying ages. Among the many conclusions reached the following are perhaps of most interest:

Two-thirds of the males and three-fourths of the females showed skin that may be classed as medium. In only five per 1,000 in males, but fifty-two per 1,000 in females was the skin plainly lighter than medium. Only one among sixteen males and one among fourteen females has real blond hair. In approximately 1 per cent in males and but a little more in females the hair was fully black. In 2 per 100 of males and five per 100 of females the hair is red or near red.

YOUNG TIGER RULES HOTEL

If He Did Nothing Else, He Had the Bell Hops Hopping.

A full fledged, though not full grown, Honduran tiger, being entertained at a New Orleans hotel, was the innocent cause of terrorism spreading among its corps of bell hops.

First intimation received by the hotel authorities that there was a guest in one of the rooms whose name was not on the register came when one of the bell hops, three full shades paler than his usual dusky complexion, came loping down from the second floor several steps at a time to announce that there was "a fightin' will cat in room 254."

Investigation disclosed that the room was occupied by Charles A. Toce and William C. Miller of Lake Charles, La., who returned from Honduras, and the three-weeks-old kitten, which was captured by the two men during a hunt for big game in the jungles near San Pedro, Sula. The animal will be presented to the New Orleans zoo.

MEASURE COSTS BY MINUTES

Austrians Now Work Four Times as Long for Loaf of Bread.

Austrian government employees, fighting to gain payment for their labors sufficient to maintain their families, have presented their case in a novel way. Instead of relating that in the old days they could buy for five crowns what now costs them 50,000, they have used minutes of labor as a measuring unit and produced an interesting table.

In 1914 a loaf of bread cost 12½ minutes of labor. Today the cost is 49 minutes. A measure of sugar that cost 28 minutes nine years ago now calls for 102 minutes. Coal has risen from 1 hour and 18 minutes to 12 hours and 36 minutes, and a pair of shoes from 6 hours and 18 minutes to 19 hours and 30 minutes.

GUESS CHINA'S POPULATION

Post Office Estimates 436,054,953 Persons Live in Provinces.

China has a population of 436,054,953, according to the annual report of the Chinese post office at Shanghai. The figure is only a vague estimate, compiled from reports of provincial offices, as no systematic method of census taking is followed in China outside the foreign concessions.

Sze Chwan, in the western part of China, is the most populous province, being credited with having 40,782,810 inhabitants.

Honan, Shantung and Chihli provinces follow in the order named, each having more than 30,000,000 population.

Tibet Now Has Telegraph.

Tibet, heretofore regarded as one of the most isolated countries in the world, has now been connected by telegraph with India.

Hotel Stenographer BY ROE FULKERSON

"No more touring for little sister," exclaimed the Hotel Stenographer. "Did you do it?" asked the House Detective.

"Once!" said the girl, "and if I never do it again, it will be plenty soon enough for me. You know my friend, Toots Shaughnessy, bought a flier. Well, she's got a pair of goggles and a pair of khaki pants, and she thinks that with those two pair she can open any highway pot on earth."

"We left here Saturday night, and camped late at a spring down the road some place and, after we had made our beds, a cow stepped on Myrtle."

"We got to the shore Sunday and stayed in swimming so long it was almost night before we left. We drove 20 miles towards home and the road was so rough and we were so scared we decided to camp for the night. We drove into what looked like a school-house yard and parked the flier and got out our bed rolls and went to sleep. Mind you, Kelly, we went sound asleep. We were all mighty tired and nobody woke up until it was daylight and what do you think?"

"We were in a graveyard with tombstones sticking up yithin ten feet of us. We threw the bed rolls into the flier and, without waiting for breakfast, or anything, we came away from there 30 miles an hour."

"Man, Sir, think of it! We slept in a graveyard. We left the tire pump and of Toots' tools, but decided we would rather buy new ones than go back after them."

"But," said Kelly, "nothing hurt you."

"You are crazy" said the girl, "didn't I tell you it was a graveyard?"

Halloween Superstitions.

In the north of England the country people were so afraid of evil spirits coming to earth on Halloween that they built huge fires and stood on guard to see that no witches sneaked in around the flames. Some even believed if they braided straw, fastened it to a pitch fork, then set it on fire and waved it in the air, they could ward off the attacks of witches.

Notice of First Meeting of Creditors.

EMPLOYMENT FOR MANY.

Every person in Circleville realizes how badly the city is handicapped by the lack of permanent all-year-around industry.

The Hinde Paper Box company if started here will employ 140 people at the start and more in the near future, paying liberal wages.

Subscribe now and boost this excellent project along.

The East.

And then I saw the men of the East—they were looking at me. The whole length of the jetty was full of people. I saw brown, bronze, yellow faces, the black eyes, the glitter, the color of an Eastern crowd. And all these beings stared without a murmur, without a sigh, without a movement. . . . Nothing moved. The fronds of palms stood still against the sky. Not a branch stirred along the shore, and the brown roofs of hidden houses peeped through the green foliage, through the big leaves that hung shining and still like leaves forged of heavy metal. This was the East of the ancient navigators, so old, so mysterious, resplendent and somber, living and unchanged. —Joseph Conrad, in Youth.

Sweet Talk at a Discount.

"Warmth and softness will never melt a girl's heart," sighed the young man who had tried to make an impression on a girl by saying sweet things. "I should say not," replied the fellow who had been jilted. "It is hardness and coldness that melt their hearts—diamonds and ice cream." —London Tit-Bits.

GEO. W. LITTLETON.

TITLES MATTER OF COURTESY

Proper Terms Indicated for Addressing Sons and Daughters of Peers.

Some interesting points dealing with the legal positions of the sons and daughters of peers were given in a society paper some time ago. According to the writer, the eldest sons of dukes, marquises and earls are called by one of their father's second titles; but in the eyes of the law they are only esquires, and possess rank and coronet as a mere matter of courtesy.

It may be noted that the eldest son of a duke holds the same precedence whether he bears the title of marquis, earl or viscount; while the younger sons of dukes and marquises are called by courtesy "lords," and their daughters are styled "ladies," but legally they have no handles to their names, and are, in fact, commoners. Thus, "Lord John West" is by law plain "John West," and "Lady Alice West" is simply "Alice West." However, custom accords them honorable mention, and their letters must be addressed "The Lord John West," "The Lady Alice West." In the case of all these titles, from that of a duke downward, the "The" must never be omitted.

It must be remembered, however, that this is not the case with regard to foreign titles of nobility. A foreign baron or baroness, comte or comtesse, marchese or marchesa, should be addressed as "Baron Fernstein," "Comtesse Delorme," and "Marchesa Viria," and letters to them would begin "Dear Baron," "Dear Marchesa," and so on. The magic "The" must be omitted.

To return to the British peerage. The younger sons of earls and all the sons and daughters of viscounts and barons are styled "honorable," and of course, the sons' wives also.

To write "The Hon. Miss South" is incorrect; the Christian name should be used, and the letter be addressed: "The Hon. Sylvia South." An earl's eldest son who takes one of his father's second titles is styled "Viscount South" or "Lord South," but if he happens to marry the daughter of a duke or marquis the lady retains her own rank, which is higher than his, and thus becomes "Lady Grace South" and not "Lady South," as she would be if she were a commoner.

Peers sign the name of their title only, and never their Christian name. Thus the Duke of Somerset would sign a letter "Somerset." If the title happens to be a double one, the name is written in full, "Brougham and Vaux," "Mowbray and Stourton." And peeresses practically have no Christian name.

They sign a letter with the initial of their first name as a prefix to their husband's title. Thus Lady Derby would sign a letter "C. Derby." —London Tit-Bits.

Bible Thought for Today

THE EVER WELCOME MESSENGER.—How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace; that bringeth good tidings of good, that publisheth salvation; that saith unto Zion, Thy God reigneth!—Isa. 52:7.

PUBLIC SALE.

Poverty and Splendor.

I saw many poor, whom I supposed to live in affluence. Poverty has, in large cities, very different appearances; it is often concealed in splendor, and often in extravagance. It is the care of a great part of mankind to conceal their indigence from the rest; they support themselves by temporary expedients and every day is lost in contriving for the morrow. —Dr. Samuel Johnson.

Hard "Situation."

A dusky chauffeur who recently brought the frame of a big truck from Detroit to Youngstown rode part of the way sitting on the gas tank, but the seat was so hard he soon became tired of it. "Ah don't see how you could stan' it, Henry," a friend observed. "Stan' it," Henry replied. "Mah goodness, dat's jes what Ah couldn't do nothin' else but."

THE WONDER OF THE AGE

THE HOT BLAST AIR TIGHT FLORENCE

NO SMOKE! NO SOOT! NO DIRT! NO CLINKERS! EVERYTHING IS CONSUMED.

At the end of the season's use with soft coal, there will be no soot in the pipe or flue

The Zenith of Stove Perfection

The only jointless leg bottom and base with full radiation and large ash pan that is on the market! or has ever been made in the history of the stove industry.

The jointless leg bottom and base makes the stove air-tight below the grate, which is the only true fire keeping principle.

It will be as good a fire keeper twenty years hence as it is today.

The Hot Blast Air-Tight Florence will heat twice the space that can be heated by any other stove on earth at one-half the cost.

The only perfect floor heater that is or has ever been made.

All features are patented and no stove manufacturer, dealer or user can copy or use same until the expiration of the patent without incurring liability for an action for damages.

THE HOT BLAST AIR-TIGHT FLORENCE burns soft coal or slack and all the smoke and gases. No filling up of the stove, pipe or flue with soot. No dirt inside or outside the house. It will burn hard coal and all the gases which escape from the hard coal base burner. It will burn wood and sawdust, wet or dry. It will produce one-half less ashes than any other stove on earth with any kind of fuel and leave no clinkers or half consumed fuel.

GERRY SHOWS HOW

By JANE JORDAN

(© 1923, Western Newspaper Union.)

GERRY went back and sat down by the pool where fountains played. She was much discouraged and altogether disappointed.

Barry, her sweetheart from school-time days, was able to drive out to the White Farms each Saturday evening, and also to later drive his adored Gerry along the shore, in enchanted moonlight. Therefore, Barry was astounded, and disappointed in her decision. "Not going to White Farms?" he had asked amazed. Gerry fidgeted, but the truth came out.

"I want to know different people, Barry. Don't you understand? One makes one's friends and may one not cultivate prosperous friends as well as the ordinary? I'm going to stop for two or three weeks, if my money lasts, at the Hill Top house in the mountains, where Gwendolin Thayer spends her summers.

"Gwendolin Thayer!" Barry's tone was sarcastic. "So you are going to try to climb up to the haughty Gwen's position—in society. Why, dear child—" he dropped into the provokingly indulgent "Gwendolin's father has the money to buy her way. You can't get by among those Hill Top snobs—with an ingratiating smile."

Beyond the pool where Gerry sat, screened by sheltering trees, stood an invalid chair. Gerry had noticed this wheel chair and its bent and wrinkled occupant before. And she had conquered the impulse which urged her to speak to the lone old lady.

Gerry approached. "The sun shines through the leaves on your face," she said, and smiled her winsome smile. "May I push your chair—so?"

"Thank you, my dear." Here was a tone natural in its cordiality. "You seem to be as alone, as I, in this gay resort. Loneliness may be expected by a sick old woman—but when one is young and—" the thin lips smiled, "and as good looking as you, my dear—why, loneliness is a crime. I have seen you day after day—tell me about it."

And to her own astonishment, Gerry obeyed the sympathetic request. She told of the determined trip to the mountains—of Barry and his discouragement—of the White Farms where she had been simply happy. Of the home, too, which death had severed, of her new departure then into the business world—of the painstaking saving for this! Gerry told it all; and the sharp glancing eyes of her listener drew her on and on. The wrinkled smile came again:

"And you hate to have Barry—the satisfied rascal—say 'I told you so.' I've never relished that sort of thing myself. Always liked to show 'em, too, my dear. And I have, a few times. Even since I've come to this. Surprising folks in a pleasing way is one of the few joys left me. This—" the invalid waved her hands across her prostrate form, "came of an automobile accident. And I'll not walk the rest of my days. I'm for staying comfortably at home, with a kind soul or two to care for me, but my son—and oh! he's a good son; he won't hear of it. So, when he has a business trip, like the one which brought him here, he brings me with him. Thinks the change of air does me good. My dear, are you to miss the fete this evening—a moonlight fantasy, with garlanded box seats on the lawn? The boxes cost enough, goodness knows. How the rich can spend!—and are no happier. But you, little Cinderella, are you to be alone, back among the trees—as usual?"

"I am to be alone," Gerry answered, and added, "unless you will let me keep you company."

"Thank you. That's kind again. But my son will be here and will be insisting that I let him draw my chair to a garlanded box to watch the tableaux. And as I'm a determined old woman I'll tell you what I'm going to have him do. I am going to ask him, as my special desire, to take you instead—so get out your prettiest dress. Warring is not a young man, but he's a handsome one. He is devoted to his work and finds no time for society of women. Some of them would seek it—you know of Miss Gwendolin Thayer? She would have had my son a guest tonight in their family box."

Gerry leaned forward; her soft laughter rippled. "Your son? I do not even know his name," she said. "You will when you hear it," the elder woman answered dryly. "My son is Warring Webster, the sculptor. He is here in consultation. Warring is now at work on the Victory statue of the high mountain."

A man came smiling and bowing his way through the assembled guests on the lawn. He was a handsome man as his mother had said, and his eyes bright, glancing like hers, rested on Gerry's face.

"My little new friend, Warring," the old lady introduced her.

The fete was a beautiful achievement. Gerry remembered it long years after.

Barry, sitting in his dusty office, read the newspaper account next day. "In box No. 1, Warring Webster, sculptor and well-known financier; Miss Geraldine Drew of Conover Town, his companion."

Barry's chair came to the floor with a jolt; he turned to the surprised friend who sat near him:

"I'm going to catch the 6:15 for Hill Top," said Barry, "and fetch that girl home."

Savages Poor Physically.
The natives of the African jungle, instead of being the lusty savages of imagination, are for the most part physically below par. The majority of them are malnourished and diseased and marked physical defects are common.

When You're Beaten.
No man is beaten until he releases his grip on his life aim. No man is beaten so long as he faces and works toward his goal, no matter whether he reaches it or not.—The New Success.

PAINT BARGAINS

PUMPKIN SHOW SUBSCRIPTIONS

The classified list of donors to the Pumpkin Show fund will be published in the papers October 17. All paid in subscriptions received up to Tuesday evening, October 16, will be included. The solicitors will try to complete their work by Tuesday noon. If anyone has been missed please send your check or call George Foerst Phone 83 or E. W. Lutz phone 104.

IT PAYS TO ADVERTISE

NEW AREA IN FLYING NEAR

Inexpensive Transportation Fore-
shadowed by Remarkable Success
Attained by Motor Gliders.

A new era in air flying, that of cheap, safe, popular airplaning, is foreshadowed by the remarkable success attained by tiny British airplanes called motor gliders. One of these, a small monoplane fitted with a three-horse power engine, recently reached a speed of 53 miles an hour during tests near London. It climbed to 2,350 feet, and, although in the air for an hour and 20 minutes, consumed less than a gallon of gasoline.

French aviation experts also are perfecting similar "rocket-planes," intended for use by amateur aviators and sporting enthusiasts. In England a small "car with wings," capable of carrying its owner through the air at the speed of an express train with no more power than is required by a motorcycle, has reached such a practical stage that orders are being booked for it by the public.

Rising out of small fields and being wonderfully controllable in the air, these cheaply-run winged cars are to be made to alight so slowly that the risk of a crash on landing, even under adverse circumstances, will be practically eliminated. Furthermore, such machines will be so handy on the ground, and their wings will fold so neatly, that it will be possible to house them in ordinary motor garages.

It is expected that the owner of one of these machines will be able to make the trip from London to Paris and back, sweeping high over the channel and escaping all the irritations and delays of earth transport, for about \$5. A movement is now on foot to get motor-garage proprietors to set aside smooth-surfaced fields, marked clearly so they can be seen from above. In this way the drivers of little "air cars," when on week-end aerial rambles, will have points all over the country where they can descend and replenish their gasoline tanks, or make any necessary repairs or adjustments.

Must Guard Our Pheasants.

The shots and shells of the World war are even now damaging the game birds of America, indirectly but none the less vitally. Lee S. Crandall, curator of birds of the New York Zoological park, in a report to the American Game Protective association warns that unless the few fortunate possessors of avian pheasants cherish and increase them during the coming breeding season all species are in danger of becoming virtually extinct. The industry of collecting and distributing wild birds and animals has been badly demoralized by the war and American breeders can no longer depend upon European importations for supply, he explained. The seed stock of many kinds of game birds and waterfowl has become dangerously reduced and even if it is possible to obtain fresh stock, the newly-imported, wild-caught birds often breed with great reluctance and years must pass before a prolific breeding strain can be developed from them.

Center of Goldfish Industry.

What makes Philadelphia the center for breeding those rare and wonderful fish one sees in an aquarium? Experts tell me it is the center and regularly produces the largest crop of goldfish of unusual types and other strange kinds of what I may call toy fish. You will find the reason for this odd industry in those despised ditches which crisscross the Neck.

It seems that even a parlor fish thrives best on its natural food. Fish culturists know that and so they go down to the Neck and scoop up from these stagnant water-holes and trenches the larvae which to a fish are as beefsteak and baked potatoes to an athlete.

I have it from a sea captain who has been everywhere that here he finds the largest variety and best specimens of those fish which are meant to please the eye, but not appease the stomach.—Philadelphia Inquirer.

To Hunt Fossils in Patagonia.

A five-year hunt for fossils of extinct species of mammals which appeared ages ago, will be begun soon, when Prof. Elmer S. Riggs, associate curator of paleontology of the Field Museum of Natural History, of Chicago, and three assistants will sail for Buenos Aires on the first leg of their expedition. After exploring the Argentine pampas, the party will strike southward along the Atlantic coast as far as the Straits of Magellan. In places the work will be along beaches where the ledges are accessible only a few hours each day. In the extremity of Patagonia, a land of strange legends and folk-story, the party will search for fossil remains of unique and much more ancient animals, which existed in South America in the ages when it was almost as widely separated from North America as Australia is now separated from Asia. This isolation accounts for strange fossils.

Acts to Save Animals' Teeth.

The Royal Zoological society which runs the "zoo" in Regents' park has a new curator and one of the first things he did when he assumed office was to put the apes on a diet of hardtack so as to save their teeth, which were becoming loosened on a diet of bananas, potatoes, oranges and bread. The trouble seemed to be a loosening of the teeth like pyorrhea. The unwilling boarders at the zoo take to the hardtack and seem to prefer it to the soft food.

CEYLON IS LAND OF WALKING FISH

Famous Cinnamon Gardens of Colombo Given Over to Park and Home Sites.

Washington.—A land where fishes walk along the roads and climb rocks and trees, where crabs fling sand into the air and elephants play tricks like sportive children—such, says a bulletin from the National Geographic society, is Ceylon, where Great Britain is negotiating with the natives concerning important government reforms. "Colombo, the present capital," continues the bulletin, "has a magnificent artificial harbor built by the British. That city superseded the former principal seaport, Galle. In the new port city the native quarter, with its beautiful Sinhalese girls, its jewel grinders and lace makers, contrasts sharply with stately government buildings and European customs of the English section.

Ancient Wonder-City.

"The famous Cinnamon gardens, where the Dutch formerly cultivated that spice in enormous quantities, today are given over mainly to a park and bungalows and here houses of well-to-do residents nestle in bowers of wondrous beauty and sweet perfume.

"Scanty remains of the ancient capital, Anuradhapura, lie in lofty mountains amid matted jungle growths. Glowing descriptions of this ancient wonder-city by Arab, Persian and Greek voyagers led to the excavation work, now going on, which has been slow because of its vast size.

"Near by is the sacred mountain of Mihintale, with its huge irrigation tanks, one of them begun five centuries before the Christian era. This tank covered 40 square miles with its waters when it was new.

Buddha's Enormous Tooth.

"Kandy, the last native capital, sets picturesquely above the blue waters of a little lake, also artificial. In making it the native ruler ruthlessly drowned out scores of his subjects' rice fields. Hidden in gold and ruby-encrusted bell shrines a mythical 'tooth of Buddha' is preserved.

"The present 'tooth' obviously could not have grown in any human mouth—it is two inches long and half an inch thick at the base. The visitor forgives the fiction for the sake of the August night celebration, when the tooth is carried about the town accompanied by a procession of devil dancers in their grotesque masks.

"Adam's Peak, a strange mountain top where a huge natural depression resembles an enormous human foot, also is an object of veneration. From this mountain Buddha is supposed to have ascended to heaven. Millions of devout pilgrims worship there. Even the non-believer is impressed by the scene at dawn, when the sun first tints a sea of clouds, and projects slender shadows upon the countryside.

Immigrants Supplanted Natives.

"When the civilization of the Sinhalese was at its height, more than 2,000 years ago, the capital, Anuradhapura, was a marvelous city extending over some 250 square miles. It was clustered with magnificent palaces, pagodas and monster relic-shrines of delicate design. This civilization was overthrown by Tamil mercenaries whom the Sinhalese imported from India; subsequently the island was held successively by the Portuguese, Dutch and now by the English.

"The 'walking fish' performs its terrestrial antics when ponds dry up in the hot season. Then it either burrows into the soft mud to wait for rain, or, by night, crawls out of the last shallow depressions and goes writhing off through dripping grass on the hunt for other pools. The natives then literally 'catch fish,' sometimes gathering them up by the bushel.

"The island's area is about that of West Virginia and on it live more people than there are in Texas."

Russians and the Poles

Disagree on War Spoils

Moscow.—According to information received by Rul from Varsow, serious misunderstandings have taken place between the Polish and Russian delegations of the commission for re-education, at Moscow. In keeping with the stipulations of the Treaty of Riga, this commission has been intrusted with drawing the lists of factories, machines, stocks of goods, etc., evacuated during the war from Poland to Russia and which should be returned to Poland.

The soviet delegation refuses to comply with the Polish demands, asserting that most of the evacuated articles perished. Another commission dealing with the re-education of paintings and other museum pieces has reached a deadlock.

White Crow Captured by Youth Near Zoo

Sault Ste. Marie, Ont.—Reggie Bailey, ten-year-old son of Peter Bailey, during a ramble through the bush on the outskirts of the Zoo, captured a white crow. The bird, which is not yet fully grown, is perfectly white with the exception of the tips of the tail feathers, which are black.

FIRE IN STORE

Burning Excelsior in Furnace Nearly Destroyed Chillicothe Block.

A fire in the Mykrantz drug store, corner of Paint and Second streets, Chillicothe, broke out Saturday morning and for a time threatened the whole block. Worley Rodeheaver, an employe of the store, was burning excelsior in the furnace and had turned his back for a short time and a portion of the excelsior fell from the furnace and set fire to more of it on the floor. He tried to stamp out the flames but they got the better of him and soon spread to other parts of the basement. The fire was finally extinguished. The loss is estimated at between \$1200 to \$1500.

Woman's Rights.

An Indiana court compelled a man to give back the false teeth he had taken away from his wife. Women's rights still include the privilege of biting, it seems.—Cleveland Plain Dealer.
